THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE TWO-CHAPTER TEST SET C

Chapters 7 & 8: **Particulate Nature of Matter, Nature of Matter: Elements, Compounds and Mixtures** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Interparticle attraction is strongest in: 1

(a) gases **(b)** vacuum **(c)** solids **(d)** liquids

2. Liquids have: 1

(a) definite volume but no fixed shape **(b)** no volume but fixed shape

(c) fixed shape and volume **(d)** neither volume nor shape

3. Water practically cannot be compressed because: 1

(a) it is a gas

(b) it has no particles

(c) its particles are already close with little space

(d) its particles are far apart

4. The temperature at which a liquid boils is its: 1

(a) boiling point **(b)** room temperature **(c)** melting point **(d)** dew point only

5. Which solid has the strongest interparticle forces among ice, urea and iron? 1

(a) ice **(b)** urea **(c)** iron **(d)** all are equal

6. A uniform mixture is one in which: 1

(a) components are in clear layers **(b)** components are evenly distributed

(c) only solids are present **(d)** only one substance exists

7. Brass is an alloy of: 1

(a) copper and zinc **(b)** copper and tin **(c)** iron and carbon **(d)** gold and silver

8. Stainless steel is stronger than pure iron because it is a: 1

(a) compound **(b)** gas **(c)** mixture (alloy) **(d)** pure element

9. Which of these is an element? 1

(a) Rust **(b)** Water **(c)** Oxygen **(d)** Salt

10. Compounds have elements combined in a: 1

(a) random ratio **(b)** varying ratio **(c)** zero ratio **(d)** fixed ratio

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. Draw a simple sketch to show the particle arrangement in a solid, liquid and gas (describe). 2

12. Why does spilled milk spread while a glass tumbler keeps its shape? 2

13. Why is air considered a mixture? 2

14. What is Mishraloha? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 30–40 words each.

15. Give three examples each of solids, liquids and gases. 3

16. Explain how minerals are found in rocks. 3

17. Why does a gas exert pressure on the walls of a container? 3

OR

Can a sample of water be a solid, a liquid and a gas? Explain. 3

18. Identify the gas A when iron filings react with dilute HCl and write the test of the gas. 3

OR

Why is distilled water a pure substance but tap water a mixture? 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 80–100 words each.

19. A candle burns. Identify the states of wax in solid, liquid, vapour form and draw particle pictures. 5

OR

Explain why a sample of gas fills the container completely but a liquid takes only the lower part. 5

20. Analyse the experiment where iron filings are dropped in dilute hydrochloric acid and compare with iron sulfide in acid. 5

OR

Write on the metalloids: position, properties and examples of silicon and boron. 5

END OF QUESTION PAPER Total: 40 Marks

MASTERMIND
