THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE UNIT TEST SET B

Chapters 1–4: **Exploring the Investigative World of Science, The Invisible Living World: Beyond Our Naked Eye, Health: The Ultimate Treasure, Electricity: Magnetic and Heating Effects** | RBSE Pattern | Session 2026–27

Time: 2 Hours Name: _____ Roll No.: _____ **Maximum Marks: 50**

General Instructions:

1. All questions are compulsory.
2. Q. 1–12 are Objective Type (1 mark each).
3. Q. 13–17 are Very Short Answer Type (2 marks each).
4. Q. 18–23 are Short Answer Type (3 marks each).
5. Q. 24–25 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 22 to 25.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 12 × 1 = 12

Choose the correct option and write it in your answer book.

1. Which of these is NOT a good scientific question? 1

(a) Does oil volume change frying time? **(b)** Which colour is the nicest?
(c) How does temperature affect puffing? **(d)** Does flour type matter?

2. The kite on right-hand pages symbolises: 1

(a) a festival only **(b)** a map
(c) curiosity taking flight **(d)** a weapon

3. A measurement should always be written with its: 1

(a) unit **(b)** colour **(c)** nickname **(d)** shadow

4. Which organism is a fungus? 1

(a) Yeast **(b)** Spirulina **(c)** Amoeba **(d)** Lactobacillus

5. Which organisms are always multicellular? 1

(a) viruses only **(b)** plants and animals
(c) yeast only **(d)** bacteria and protozoa

6. Curd is formed from milk by the action of: 1

(a) Amoeba **(b)** yeast **(c)** Lactobacillus **(d)** Rhizobium

7. Penicillin was obtained from a: 1

(a) mould **(b)** bacterium **(c)** virus **(d)** protozoan

8. Antibiotic resistance arises mainly due to: 1

(a) washing hands **(b)** eating balanced diet
(c) misuse of antibiotics **(d)** use of vaccines

9. Cholera spreads mainly through: 1

(a) mosquito bite **(b)** contaminated water and food
(c) sunlight **(d)** handshake only

10. Who built the first battery using metals and a wet medium? 1

(a) Luigi Galvani **(b)** Edison **(c)** Oersted **(d)** Alessandro Volta

11. When current flows in a wire near a compass needle, the needle: 1

(a) stops the current **(b)** melts
(c) gets deflected **(d)** stays unaffected

12. The longer lead of an LED should connect to the: 1

(a) positive terminal **(b)** lemon only
(c) negative terminal **(d)** iron core

SECTION — B (Very Short Answer Type) — 5 × 2 = 10

Answer in about 10–15 words each.

13. Why should notes be kept during an experiment? 2

14. Name the levels of organisation in a multicellular organism. 2

15. Name two ways communicable diseases spread. 2

16. State the WHO definition of health in one sentence. 2

17. How can the polarity of an electromagnet be reversed? 2

SECTION — C (Short Answer Type) — 6 × 3 = 18

Answer in about 30–40 words each.

18. List three factors that may affect how a puri puffs. 3

19. Draw the labelled structure of a typical animal cell and name three parts. 3

20. Write the cause, site and prevention of cholera. 3

21. A student passes current through a nichrome wire and then a copper wire of same size. Predict and explain. 3

22. Write any three qualities of a scientific attitude. 3

OR

A student wants to know whether oil temperature affects puffing. 3
(i) What will she change?
(ii) What will she measure?
(iii) What should she keep the same?

23. Explain the difference between a tissue and an organ with examples. 3

OR

Explain with an activity how yeast produces gas from sugar. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

24. Why is recording observations important? Describe what a good record of the puri experiment would include. 5

OR

Design an investigation to find how oil temperature affects puffing of puris. Write 5
(i) the question,
(ii) the variable,
(iii) the fixed factors,
(iv) the measurements and
(v) how you will record results.

25. Explain the discovery of the smallpox vaccine using the steps: observation, hypothesis, experiment, result, application. 5

OR

Explain how vaccines work and why the immune system needs training. Mention two types of vaccine content and one example. 5

END OF QUESTION PAPER — Total: 50 Marks
