## ANSWER KEY & MARKING SCHEME SET A

Chapter 8: **World Geography** | Class 8 Social Science | Maximum Marks: 40

### SECTION — A (Objective Type) — Answers — 10 × 1 = 10

| Q. | Correct Option | Brief Reasoning |
|---|---|---|
| 1 | **(c)** water bodies | Oceans, seas, lakes, rivers |
| 2 | **(a)** 71 per cent | Why Earth is the ‘blue planet’ |
| 3 | **(a)** Pacific Ocean | Whales and tuna live here |
| 4 | **(c)** chemicals in the water | No light, so no photosynthesis |
| 5 | **(c)** the Red Sea and the Mediterranean Sea | Shortest sea route from India to Europe |
| 6 | **(c)** Mongolia and northern China | Land of the Eternal Blue Sky |
| 7 | **(d)** farming, trade and dense populations | Fertile soils; wheat, barley, rye, potatoes |
| 8 | **(b)** South America | Home to Mount Aconcagua |
| 9 | **(d)** Antarctica | A cold desert over 14 million sq km |
| 10 | **(a)** Both A and R are true and R is the correct explanation of A | R explains A |

### SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 11 | A nearly spherical shape (1). It bulges at the middle (equator) and is flattened at the poles (1). | 1+1 |
| 12 | The Earth is a curved, nearly spherical body (1). Drawing it on a flat surface stretches or squeezes size, shape or direction (1). | 1+1 |
| 13 | Use: preserves shape and direction, helpful in navigation (1). Limitation: distorts size near the poles, e.g. Greenland looks as big as Africa (1). | 1+1 |
| 14 | Oceans cover about 71 per cent of the surface (1). Seen from space, the Earth therefore looks blue (1). | 1+1 |

### SECTION — C (Short Answer) — Answers — 4 × 3 = 12

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 15 | Blue shows water bodies (1). Green plains, yellow/brown plateaus (1). Dark brown mountains, light yellow deserts, white ice (1). | 1+1+1 |
| 16 | Mercator preserves shape and direction (1). It distorts size near the poles (1). Robinson is a compromise balancing size and shape distortions (1). | 1+1+1 |
| 17 | Cover 71% of the surface and hold 97% of the water (1). Plankton give almost half our oxygen (1). They regulate the climate and support life (1). | 1+1+1 |
| | **OR:** Pacific, Atlantic, Indian, Arctic, Southern (1). Pacific is largest and deepest (1). Arctic is smallest and shallowest or Southern encircles Antarctica (1). | 1+1+1 |
| 18 | Warm currents take warm water to cooler areas and cold currents the opposite (1). They change the temperature of nearby coasts (1). The Gulf Stream makes the UK warmer than other places at the same latitude (1). | 1+1+1 |
| | **OR:** Near-freezing temperature, great pressure, complete darkness (1). No photosynthesis possible (1). Life uses energy from chemicals in the water (1). | 1+1+1 |

### SECTION — D (Long Answer) — Answers — 2 × 5 = 10

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 19 | Earth is an oblate spheroid; flattening causes distortion (1). Peel-of-orange idea (1). Mercator preserves shape and direction (1). Distorts size near poles (1). Robinson is a compromise (1). | 1+1+1+1+1 |
| | **OR:** Cover 71% and hold 97% of water (1). Plankton give oxygen (1). Regulate climate (1). Trade and fishing (1). Home to rich life from plankton to whales (1). | 1+1+1+1+1 |
| 20 | Pacific largest and deepest (1). Atlantic busy trade routes and fishing (1). Indian warm waters and biodiversity (1). Arctic smallest with sea ice (1). Southern around Antarctica (1). | 1+1+1+1+1 |
| | **OR:** Warm and cold currents (1). Climate effect (1). Gulf Stream and UK (1). Mariana Trench, Challenger Deep over 11,000 m (1). Life using chemical energy (1). | 1+1+1+1+1 |

**Evaluator's note:** Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

## ANSWER KEY & MARKING SCHEME SET B

Chapter 8: **World Geography** | Class 8 Social Science | Maximum Marks: 40

### SECTION — A (Objective Type) — Answers — 10 × 1 = 10

| Q. | Correct Option | Brief Reasoning |
|---|---|---|
| 1 | **(b)** nearly spherical but bulging at the middle | Why flat maps distort |
| 2 | **(c)** 97 per cent | Most water is salty |
| 3 | **(d)** Southern Ocean | Penguins and seals |
| 4 | **(c)** shelter about one-quarter of all ocean species | Rich biodiversity |
| 5 | **(b)** Bay of Bengal | Important for trade and climate |
| 6 | **(d)** flat, unforested grasslands | A global carbon sink |
| 7 | **(a)** Alps | Mont Blanc is a famous peak |
| 8 | **(d)** discarded clothes from fast fashion | Called an environmental and social emergency |
| 9 | **(a)** cartographer | Map-maker |
| 10 | **(a)** Both A and R are true and R is the correct explanation of A | R explains A |

### SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 11 | They absorb heat and release it slowly (1). They add moisture to the air, forming clouds and rainfall (1). | 1+1 |
| 12 | A large stream of water flowing in the ocean like a river (1). Warm currents and cold currents (1). | 1+1 |
| 13 | The deepest V-shaped trench on the sea floor (1). Its Challenger Deep reaches over 11,000 m below sea level (1). | 1+1 |
| 14 | A ridge at or near the ocean surface, natural or artificial (1). Natural reefs are made of rock or built by tiny sea animals called corals (1). | 1+1 |

### SECTION — C (Short Answer) — Answers — 4 × 3 = 12

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 15 | Shelter about one-quarter of all ocean species (1). Called rainforests of the sea (1). Threats: overfishing, pollution, climate change (1). | 1+1+1 |
| 16 | Off the north-eastern coast of Australia (1). About 2,000 km long, covering about 350,000 sq km (1). Rich in corals and fish; a UNESCO World Heritage Site (1). | 1+1+1 |
| 17 | Bays are broad inlets of the sea (1). They shield ships from strong open-ocean winds (1). So they became safe havens for ports and dockyards (1). | 1+1+1 |
| | **OR:** North of the Himalayas (1). Formed by collision of Indo-Australian and Eurasian plates (1). About 2,500 km by 1,000 km with average height over 4,500 m (1). | 1+1+1 |
| 18 | Influences the climate of Asia (1). Source of rivers such as Indus, Brahmaputra and Yangtze (1). Holds large fresh-water reserves, the Third Pole (1). | 1+1+1 |
| | **OR:** Eight to nine months of sunny weather but winters fall to minus 30°C (1). Sparse vegetation (1). Herds move seasonally to pastures that depend on underground water (1). | 1+1+1 |

### SECTION — D (Long Answer) — Answers — 2 × 5 = 10

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 19 | Meaning of reef (1). Rainforests of the sea (1). Great Barrier Reef details (1). Bleaching causes (1). Conservation need (1). | 1+1+1+1+1 |
| | **OR:** Sea, Arabian Sea (1). Gulf, Persian Gulf (1). Bay, Bay of Bengal; Strait of Malacca (1). Canal, Suez, 1869 (1). Role in trade and ports (1). | 1+1+1+1+1 |
| 20 | Tibetan Plateau size and height (1). Formation by plate collision (1). Third Pole and rivers (1). Gobi location and climate (1). Life in the Gobi, solar and wind energy (1). | 1+1+1+1+1 |
| | **OR:** Steppes: grassland, 8,000 km, carbon sink (1). Birds and nomads in yurts (1). Urals: 2,500 km boundary of Europe and Asia (1). Taiga, tundra, minerals (1). Permafrost and climate change (1). | 1+1+1+1+1 |

**Evaluator's note:** Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
