CLASS 8 — SOCIAL SCIENCE CHAPTER TEST SET B

Chapter 13: **Dynamics of Population** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat maps and diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which of these is NOT a component of demography as shown in the chapter? 1

(a) Structure and composition **(b)** Soil type
(c) Size **(d)** Pattern and trend

2. In 2023, the most populous country in the world became: 1

(a) China **(b)** Indonesia **(c)** India **(d)** United States

3. The rapid rise in world population from the 1950s was mainly because of: 1

(a) fall in food production
(b) a sudden fall in life span
(c) medical advances and better sanitation reducing deaths
(d) ban on migration

4. If the fertility rate stays below 2.1 for a long time, the population is likely to: 1

(a) shrink over time **(b)** double quickly
(c) stay exactly the same forever **(d)** become younger

5. India's fertility rate fell from 5.7 in 1950 to about ___ in 2025. 1

(a) 6.5 **(b)** 4.5 **(c)** 1.9 **(d)** 3.0

6. Child mortality means deaths of children under: 1

(a) 18 years per 10,000 **(b)** 1 year per 100
(c) 5 years per 1,000 live births **(d)** 10 years per 1,000

7. In Stage 1 of the demographic transition: 1

(a) both birth and death rates are high **(b)** both rates are low
(c) death rate is high and birth rate is low **(d)** birth rate is zero

8. A population pyramid with a wide base shows: 1

(a) a young and growing population **(b)** an ageing population
(c) equal numbers in every age **(d)** no children

9. After 2050, India's population is expected to: 1

(a) double again
(b) become much younger
(c) stop having a working-age group
(d) start moving towards an older age structure

10. **Assertion (A):** The birth rate and the fertility rate mean exactly the same thing. 1
Reason (R): Birth rate counts live births per 1,000 population, whereas fertility rate is the average number of children per woman.

(a) Both A and R are true and R is the correct explanation of A
(b) Both A and R are true but R is not the correct explanation of A
(c) A is true but R is false
(d) A is false but R is true

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 10–15 words each.

11. Differentiate between birth rate and fertility rate. 2

12. What is replacement level fertility? 2

13. State two reasons for falling birth rates. 2

14. What is the sex ratio? Give India's figure for 2011. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Describe China's One-Child Policy and its effects. 3

16. Explain why India's fertility rate has fallen from 5.7 to 1.9. 3

17. Use the table of states to show the relation between fertility and women's literacy. 3

OR

How has life expectancy and child mortality changed in India? 3

18. Explain how migration changes the population of an area. 3

OR

Explain the three stages of demographic transition. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. Explain China's One-Child Policy and the demographic problems it faces. 5

OR

Explain the three stages of demographic transition with the Indian example. 5

20. Describe the causes and effects of migration. 5

OR

Explain the sex ratio and discuss the trend in India. 5

END OF QUESTION PAPER — Total: 40 Marks
