SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Classify natural resources by use with one example each. 3

16. Explain why petroleum under the ocean is not a resource unless certain conditions are met. 3

17. Explain the condition for a renewable resource to remain renewable. 3

OR

Describe how a fallen tree shows that Nature works in cycles without waste. 3

18. Explain the glacier example of renewable resource under threat. 3

OR

Describe the traditional practice and the modern threat to fish populations. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. Explain the three conditions for something to become a resource, with an example for each, and say why they matter. 5

OR

Classify natural resources by use and by renewability. Give two examples of each class. 5

20. Explain restoration and regeneration. Why do renewables become depleted by human actions? Give two examples. 5

OR

Describe how the unequal distribution of resources affects settlement, trade and conflict, with examples. 5
