THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE CHAPTER TEST SET A

Chapter 10: **Tissues in Action** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A group of similar cells performing a specific function is called a: 1

(a) tissue **(b)** organelle **(c)** organ **(d)** system

2. Grass regrows after being cut because of: 1

(a) intercalary meristem **(b)** apical meristem
(c) collenchyma **(d)** lateral meristem

3. The outermost protective layer in young plants is the: 1

(a) epidermis **(b)** xylem **(c)** phloem **(d)** cambium

4. The tissue that stores food and has loosely packed living cells is: 1

(a) xylem **(b)** parenchyma **(c)** collenchyma **(d)** sclerenchyma

5. Coconut husk fibres used for mats are made of: 1

(a) phloem **(b)** parenchyma **(c)** sclerenchyma **(d)** collenchyma

6. Sieve tubes and companion cells are found in: 1

(a) xylem **(b)** epidermis **(c)** collenchyma **(d)** phloem

7. Blood is classified as a: 1

(a) epithelial tissue **(b)** nervous tissue
(c) connective tissue **(d)** muscular tissue

8. The tissue that stores fat is: 1

(a) blood **(b)** cartilage **(c)** adipose tissue **(d)** areolar tissue

9. The basic unit of nervous tissue is the: 1

(a) nucleus **(b)** fibre **(c)** nephron **(d)** neuron

10. The bones of the skull are joined by: 1

(a) ball and socket joints **(b)** fixed joints
(c) hinge joints **(d)** pivot joints

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. Define a tissue. Why is division of labour useful? 2

12. What are meristematic tissues? State where they are found. 2

13. Name the three types of meristems and their functions. 2

14. Why do meristematic cells lack large vacuoles? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Explain with an activity how roots grow at their tips. 3

16. Distinguish apical, lateral and intercalary meristem with the location of each. 3

17. List the characteristics of meristematic cells and relate them to their function. 3

OR

Describe how a stem keeps growing after the tip is cut. 3

18. Describe the structure and functions of the epidermis in a leaf and root. 3

OR

Explain how transpiration helps the plant. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. (i) What is a tissue?
(ii) Explain the hierarchy of organisation in a multicellular organism.
(iii) Why is division of labour beneficial? 5

OR

(i) Describe the three types of meristematic tissues.
(ii) Explain with an experiment that roots grow at their tips.
(iii) State the features of meristematic cells. 5

20. **Case study:** Data on a teak tree show its diameter increasing with annual rings.
(i) What causes the increase in girth?
(ii) Name the tissue.
(iii) How can the age be found?
(iv) What can rings tell about climate? 5

OR

(i) What is the epidermis?
(ii) What are stomata and guard cells?
(iii) Explain transpiration and its significance. 5

END OF QUESTION PAPER — Total: 40 Marks
