THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE CHAPTER TEST SET A

Chapter 12: **Reproduction: How Life Continues** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Reproduction in which a single parent produces offspring identical to itself is: 1

(a) asexual reproduction **(b)** pollination
(c) fertilisation **(d)** sexual reproduction

2. Potato reproduces vegetatively by: 1

(a) tubers (eyes) **(b)** spores **(c)** seeds **(d)** leaves

3. Moulds grow on bread because: 1

(a) light creates fungi **(b)** spores in the air settle on moist bread
(c) the bread is alive **(d)** bread produces fungi by itself

4. Humans have _____ pairs of chromosomes. 1

(a) 22 **(b)** 48 **(c)** 46 **(d)** 23

5. Pollen grains are produced in the: 1

(a) style **(b)** ovary **(c)** anther **(d)** stigma

6. Pollination between two flowers of different plants is: 1

(a) fertilisation **(b)** self-pollination
(c) cross-pollination **(d)** budding

7. Hydrilla is pollinated by: 1

(a) wind **(b)** water **(c)** birds **(d)** insects

8. The female gamete in humans is the: 1

(a) egg (ovum) **(b)** foetus **(c)** sperm **(d)** zygote

9. Menstruation occurs when: 1

(a) pregnancy begins **(b)** fertilisation takes place
(c) the sperm dies **(d)** the egg is not fertilised

10. The three stages of pregnancy are called: 1

(a) gestations **(b)** phases of puberty
(c) cycles **(d)** trimesters

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. Define reproduction. Why is it important? 2

12. Distinguish between asexual and sexual reproduction (one point each). 2

13. What is vegetative propagation? Give two examples. 2

14. What is budding? Name an organism that reproduces by it. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Describe the process of budding in yeast. 3

16. How does bread mould reproduce? Explain the activity to grow it. 3

17. Name three artificial methods of vegetative propagation and one benefit. 3

OR

Why is vegetative propagation preferred for growing banana or rose? 3

18. State the advantages and disadvantages of asexual reproduction. 3

OR

Why does sexual reproduction lead to variation? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. (i) Define reproduction.
(ii) Compare asexual and sexual reproduction in four points.
(iii) Why are clones formed? 5

OR

(i) Explain budding, spore formation and vegetative propagation with examples. 5
(ii) What is common among them?

20. **Case study:** Bread left in a moist, warm place grows fuzzy black patches. 5
(i) Name the organism.
(ii) How did it reach the bread?
(iii) How does it reproduce?
(iv) State two uses of fungi.

OR

(i) Describe the cutting technique. 5
(ii) What is grafting?
(iii) Mention three advantages of vegetative propagation.

END OF QUESTION PAPER — Total: 40 Marks
