THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE CHAPTER TEST SET B

Chapter 12: **Reproduction: How Life Continues** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Offspring produced by asexual reproduction are genetically: 1

(a) identical to the parent **(b)** different from both parents
(c) always sterile **(d)** a mix of two parents

2. Bryophyllum reproduces by: 1

(a) runners **(b)** bulbs
(c) plantlets on leaf margins **(d)** budding

3. Why do we refrigerate food? 1

(a) it makes spores
(b) it kills all bacteria
(c) it adds nutrients
(d) Low temperature slows down microbial growth

4. The number of chromosomes in a human gamete is: 1

(a) 92 **(b)** 23 **(c)** 12 **(d)** 46

5. The female part of a flower is the: 1

(a) pistil **(b)** stamen **(c)** corolla **(d)** calyx

6. Bright coloured, fragrant flowers with nectar are generally pollinated by: 1

(a) wind **(b)** water **(c)** insects **(d)** none

7. External fertilisation occurs in: 1

(a) birds **(b)** humans **(c)** dogs **(d)** fish and frogs

8. The fusion of a sperm and an egg forms a: 1

(a) zygote **(b)** foetus **(c)** gamete **(d)** embryo sac

9. The duration of the menstrual cycle is usually about: 1

(a) 28 days **(b)** 90 days **(c)** 48 days **(d)** 7 days

10. Which of these is a barrier method of contraception? 1

(a) oral pills **(b)** hormone injection
(c) copper-T **(d)** condom

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. What are spores? Why are they produced in large numbers? 2

12. State Pasteur's contribution to the study of reproduction. 2

13. What is a clone? 2

14. What are chromosomes? How many are in a human body cell? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Draw and label a flower, naming the parts of the pistil and the stamen. 3

16. Describe an activity to show that pollination is required for fruit formation in pea. 3

17. Distinguish between self-pollination and cross-pollination. 3

OR

Name the features of flowers pollinated by insects and by wind. 3

18. Describe the development of a fruit and seed after fertilisation. 3

OR

Give three examples of seed dispersal methods and plants that use them. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. (i) Draw and label a flower.
(ii) State the function of each part.
(iii) Distinguish unisexual from bisexual flowers. 5

OR

Case study: A farmer plants two varieties of maize side by side and finds seeds form only when pollen reaches the other variety. 5
(i) Name the process.
(ii) Which agent likely carries pollen?
(iii) Why is it advantageous?
(iv) Name the male and female parts involved.

20. (i) Describe pollination and its types.
(ii) Explain the agents of pollination with examples.
(iii) What happens after pollination? 5

OR

Case study: Wind pollination has low success rate for seed formation compared to insect pollination. 5
(i) Why do wind-pollinated plants produce more pollen?
(ii) Describe the pollen of an insect-pollinated flower.
(iii) Why do flowers produce nectar?
(iv) Name a bird-pollinated plant.

END OF QUESTION PAPER — Total: 40 Marks
