THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE TWO-CHAPTER TEST SET A

Chapters 11 & 12: **Patterns in Life: Diversity and Classification, Reproduction: How Life Continues** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The science of grouping organisms into categories is: 1

(a) photosynthesis **(b)** classification **(c)** reproduction **(d)** evolution

2. Five kingdoms are Monera, Protista, Fungi, Plantae and: 1

(a) Algae **(b)** Virus **(c)** Animalia **(d)** Bacteria

3. Fungal cell walls are made up of: 1

(a) lignin **(b)** cellulose

(c) chitin **(d)** peptidoglycan only

4. Lichens are used as bioindicators of: 1

(a) air quality **(b)** soil fertility

(c) water temperature **(d)** rainfall

5. Bryophytes lack: 1

(a) rhizoids **(b)** cell wall **(c)** chlorophyll **(d)** vascular tissue

6. Reproduction by budding is seen in: 1

(a) yeast and hydra **(b)** fish and frog

(c) potato and ginger **(d)** amoeba and bread mould

7. Which method is used for growing roses and sugarcane from stem pieces? 1

(a) cutting **(b)** spore formation **(c)** pollination **(d)** budding

8. Fungi are the source of the antibiotic: 1

(a) vitamin C **(b)** paracetamol **(c)** penicillin **(d)** insulin

9. Gametes are formed by: 1

(a) fragmentation **(b)** mitosis **(c)** meiosis **(d)** budding

10. Ovules are present in the: 1

(a) style **(b)** anther **(c)** stigma **(d)** ovary

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. Give two features of bryophytes. 2

12. What are pteridophytes? Give an example. 2

13. Why must gametes have half the number of chromosomes? 2

14. Name the four whorls of a complete flower. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Why are gymnosperms better adapted to dry conditions than pteridophytes? 3

16. What is plant breeding? Name two methods. 3

17. Describe Porifera and Cnidaria with one example each. 3

OR

Distinguish platyhelminthes from nematodes. 3

18. Why do animals with external fertilisation lay more eggs? 3

OR

Compare external and internal fertilisation with examples. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study:** A fern and a moss grow in a shaded garden. 5

(i) Which has vascular tissue?
(ii) Which has rhizoids?
(iii) Do both need water for fertilisation?
(iv) Which is better adapted to land and why?

OR

(i) Compare gymnosperms and angiosperms. 5
(ii) How are angiosperms classified?
(iii) Give two examples of each class.

20. (i) Compare external and internal fertilisation. 5
(ii) Why is the survival rate higher in internal fertilisation?
(iii) What is IVF?

OR

(i) Describe the human male and female reproductive systems. 5
(ii) State the functions of the testes and ovaries.

END OF QUESTION PAPER — Total: 40 Marks
