THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE TWO-CHAPTER TEST SET B

Chapters 11 & 12: **Patterns in Life: Diversity and Classification, Reproduction: How Life Continues** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Seeds with two cotyledons are found in: 1

(a) dicots **(b)** gymnosperms only **(c)** ferns **(d)** monocots

2. Hydra and jellyfish belong to: 1

(a) Nematoda **(b)** Echinodermata **(c)** Cnidaria **(d)** Porifera

3. Snails and octopuses are: 1

(a) molluscs **(b)** echinoderms **(c)** arthropods **(d)** annelids

4. Mammals are characterised by: 1

(a) gills **(b)** mammary glands and hair

(c) feathers **(d)** scales and eggs

5. The correct order of taxonomic hierarchy from the highest is: 1

(a) Phylum, Kingdom, Class, Family, Order, Genus, Species

(b) Species, Genus, Family, Order, Class, Phylum, Kingdom

(c) Kingdom, Phylum, Class, Order, Family, Genus, Species

(d) Kingdom, Class, Phylum, Order, Genus, Family, Species

6. After fertilisation, the ovary develops into a: 1

(a) stamen **(b)** flower **(c)** fruit **(d)** seed

7. Internal fertilisation takes place in: 1

(a) sponges **(b)** frogs only

(c) reptiles, birds and mammals **(d)** fishes only

8. The organ where the foetus develops is the: 1

(a) oviduct **(b)** ovary **(c)** uterus **(d)** vagina

9. The sex of a human baby is determined by the chromosome from the: 1

(a) father (X or Y) **(b)** environment **(c)** mother **(d)** doctor

10. Which is a sexually transmitted infection? 1

(a) HIV/AIDS **(b)** cholera **(c)** typhoid **(d)** malaria

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. Differentiate between gymnosperms and angiosperms. 2

12. Differentiate between monocots and dicots. 2

13. What is pollination? Name two agents. 2

14. What happens to the ovary and the ovule after fertilisation? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. State three features of annelids. 3

16. Describe metamorphosis in a butterfly or frog. 3

17. Why have arthropods been so successful? 3

OR

Differentiate between molluscs and echinoderms. 3

18. Describe the human female reproductive system in brief. 3

OR

What is the role of the male reproductive system in humans? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. (i) Classify non-chordates into their phyla with a feature and an example of each. 5
(ii) Which has tissue level organisation?

OR

Case study: An earthworm and a beetle both have segmented bodies. 5
(i) Name their phyla.
(ii) Which has the hard external skeleton?
(iii) How does it help?
(iv) Name two more phyla with segmented bodies or jointed limbs.

20. **Case study:** Ravi is growing taller, his voice is changing and his shoulders broaden. 5
(i) Which stage is this?
(ii) What brings about these changes?
(iii) Mention two changes in girls.
(iv) Why is a balanced diet important?

OR

(i) Explain the menstrual cycle with a diagram. 5
(ii) What happens if fertilisation takes place?
(iii) Why is the cycle of 28 days approximate?

END OF QUESTION PAPER — **Total: 40 Marks**
