THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE TWO-CHAPTER TEST SET D

Chapters 11 & 12: **Patterns in Life: Diversity and Classification, Reproduction: How Life Continues** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Wheat and maize are: 1

(a) ferns **(b)** dicots **(c)** monocots **(d)** gymnosperms

2. Tapeworm and planaria are: 1

(a) flatworms **(b)** annelids **(c)** molluscs **(d)** roundworms

3. Starfish and sea urchins belong to: 1

(a) Porifera **(b)** Cnidaria **(c)** Echinodermata **(d)** Mollusca

4. Frogs belong to the class: 1

(a) Pisces **(b)** Amphibia **(c)** Reptilia **(d)** Aves

5. The basic unit of classification is the: 1

(a) order **(b)** species **(c)** genus **(d)** family

6. After fertilisation, the ovule develops into a: 1

(a) stigma **(b)** fruit **(c)** seed **(d)** pollen grain

7. The male gametes in humans are: 1

(a) spores **(b)** sperms **(c)** ova **(d)** pollen grains

8. The release of an egg from the ovary is called: 1

(a) ovulation **(b)** implantation **(c)** fertilisation **(d)** menstruation

9. The baby gets nutrition and oxygen from the mother's blood through the: 1

(a) oviduct **(b)** cervix **(c)** ovary **(d)** placenta

10. The technique in which fertilisation happens in a laboratory dish is: 1

(a) layering **(b)** grafting **(c)** IVF **(d)** budding

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. State two features of arthropods. 2

12. What is binomial nomenclature? Write the scientific name of humans. 2

13. What is ovulation? What happens if the egg is not fertilised? 2

14. State two functions of the placenta. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Describe the taxonomic hierarchy with an example. 3

16. Describe the stages of pregnancy. 3

17. Why do we need scientific names? State two rules of writing them. 3

OR

Why is the Western Ghats region protected as a biodiversity hotspot and how do sacred groves help? 3

18. List four methods of contraception and the principle of each. 3

OR

Why is personal hygiene important during adolescence and menstruation? State three practices. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. (i) Explain the hierarchy of classification. 5
(ii) Give the classification of humans.
(iii) Why is the species the basic unit?

OR

Case study: Forests with rich biodiversity act as barriers to harm: mangroves reduced cyclone damage, and diverse forests lower tick-borne disease risk. 5
(i) What does a physical barrier mean?
(ii) Give an example from the case.
(iii) How do soil microbes help?
(iv) Why should we protect forests?

20. (i) Why is responsible behaviour important in adolescence? 5
(ii) Name two STIs and prevention.
(iii) Describe three contraceptive methods.

OR

(i) What is the role of meiosis in sexual reproduction? 5
(ii) How many chromosomes does a human sperm, egg and zygote have?
(iii) Explain how variation arises among siblings.

END OF QUESTION PAPER — Total: 40 Marks
