ANSWER KEY & MARKING SCHEME SET A

Chapter 2: **The Price Puzzle** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** 6 kg	sum of individual demands
2	**(c)** ₹30	QD = QS = 60
3	**(c)** 40	QD − QS
4	**(d)** quantity demanded falls	inverse relationship
5	**(b)** complementary goods	used together
6	**(c)** postpone buying	present demand falls
7	**(c)** equilibrium price	market clears
8	**(d)** price floor	e.g. minimum wage or MSP
9	**(d)** public goods	provided by government
10	**(c)** movement along the demand curve (rise in quantity demanded)	price effect

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	The quantity of a product that people are willing and able to buy at a particular price (2).	2
12	Other things remaining equal, a fall in price raises quantity demanded and a rise lowers it (2).	2
13	A table showing quantities a consumer will buy at different prices (2).	2
14	As price rises, people buy less; also marginal utility diminishes (2).	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	At ₹150 she buys 1 kg, at ₹100 2 kg, at ₹50 3 kg (2); so quantity demanded rises as price falls (1).	2+1
16	Add the quantities demanded by all consumers at each price (1.5); plot to get the market demand curve (1.5).	1½+1½
17	Market demand = 12 kg (1.5); at ₹150 = 7 kg (1.5).	1½+1½
	OR: A rise in the price of a substitute raises the demand for the other (1.5); a rise in the price of a complement lowers the demand for the other (1.5).	1½+1½
18	A rise in income raises the demand for normal goods (1.5); a change in tastes shifts demand for specific goods (1.5).	1½+1½
	OR: More people means more demand (1); more children raise the demand for sports shoes, more elderly raise the demand for healthcare (2).	1+2

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Inverse relation between price and quantity demanded (1). (ii) Schedule of price and quantity, a downward sloping curve (2). (iii) Expected price rise, status goods (2).	1+2+2
	OR: (i) 6, 11 and 18 kg (2). (ii) Yes (1). (iii) 12 kg (1). (iv) Many buyers respond together (1).	2+1+1+1
20	(i) Price of related goods, income, tastes, population, season, expectations (2). (ii) Substitutes and complements (2). (iii) Falling utility from each extra unit (1).	2+2+1
	OR: (i) Expectation of future prices (1). (ii) Present demand falls (1). (iii) Announce discounts (1). (iv) Sweaters in winter or umbrellas in monsoon (2).	1+1+1+2

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET B

Chapter 2: **The Price Puzzle** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** 11 kg	sum of individual demands
2	**(a)** ₹15	QD = QS = 50
3	**(a)** in equilibrium	QD − QS
4	**(a)** downward from left to right	inverse relation
5	**(b)** increase	substitute
6	**(d)** rises	higher profits
7	**(b)** excess supply	unsold goods
8	**(a)** control the supply and price of essential goods	price control
9	**(b)** Many buyers respond to a price change together	aggregation
10	**(c)** a rise in consumers' incomes in summer	non-price factor

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Substitutes replace each other, tea and coffee; complements are used together, cars and petrol (1+1).	1+1
12	Income, tastes and preferences, population, season, expectations (1+1).	1+1
13	The additional satisfaction from each extra unit falls as consumption increases (2).	2
14	As price rises, quantity supplied rises, and as it falls, supply falls (2).	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	If prices are expected to fall, people postpone purchases (1.5); if to rise, they buy immediately (1.5).	1½+1½
16	First mango gives high satisfaction (1); later ones give less, so willingness to pay falls (2).	1+2
17	Demand for sweaters in winter, sweets during festivals (1.5+1.5).	1½+1½
	OR: At ₹50 a seller supplies 1 kg, at ₹100 2 kg, at ₹150 3 kg (2); supply rises with price (1).	2+1
18	Higher prices raise profit (1.5); they also attract new firms (1.5).	1½+1½
	OR: Cost of inputs, technology, weather, taxes and subsidies (1+1+1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Direct relation between price and quantity supplied (1). (ii) Upward sloping curve; higher prices give higher profit (2). (iii) Cost, technology, weather, taxes and subsidies (2).	1+2+2
	OR: (i) ₹30, 60 units (1). (ii) 80 (1). (iii) 40 (1). (iv) Sellers lower the price; QD rises and QS falls until equal (2).	1+1+1+2
20	(i) Price at which QD = QS (1). (ii) Excess supply lowers price; excess demand raises it (2). (iii) Rarely stable because demand and supply keep changing (2).	1+2+2
	OR: (i) Price ceiling (1). (ii) Essential Commodities Act, 1955 (1). (iii) Sanitisers became widely available at fair prices (1). (iv) Black marketing or lower supply (2).	1+1+1+2

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
