THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET A

Chapter 3: **Shaping the Earth's Surface** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** plate tectonics	plates move on the mantle
2	**(c)** mantle	thick, hot, mostly solid
3	**(b)** Himalayan plate	Pacific, Eurasian, African are major
4	**(c)** the Indian plate and the Eurasian plate	convergent boundary
5	**(b)** weathering	physical, chemical, biological
6	**(a)** meanders	slow, wide river
7	**(d)** waves	coastal landforms
8	**(b)** fjord	e.g. Norway
9	**(c)** limestone rocks dissolved by water	caves, sinkholes
10	**(b)** Nagaland	integrated farming with bunds

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	A natural feature of the Earth's surface formed by natural processes (1); mountains and plains (1).	1+1
12	The lithosphere is broken into plates that move slowly over the mantle (2).	2
13	Crust, mantle and core (2).	2
14	Continental crust is 30–40 km thick; oceanic crust is 5–7 km thick (1+1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Crust: thin rigid outer layer (1); mantle: thick hot, partially molten layer (1); core: outer fluid iron-nickel and solid inner core (1).	1+1+1
16	Internal forces such as plate movements (1.5); external forces such as weathering and erosion (1.5).	1½+1½
17	Convergent: mountains and subduction; divergent: new crust and rift valleys; transform: earthquakes (1+1+1).	1+1+1
	OR: They occur mostly at plate boundaries where plates collide, separate or slide (1.5); stress release causes earthquakes and magma rises causing volcanoes (1.5).	1½+1½
18	Weathering breaks rocks without transport (1.5); erosion removes and carries the material (1.5).	1½+1½
	OR: Topsoil loss reduces yields (1); coasts and riverbanks lose land and houses (1); tourism and fishing suffer (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Crust, mantle, outer and inner core with features (2). (ii) 30–40 km under continents; 5–7 km under oceans (2). (iii) Rigid outer layer including crust and upper mantle (1).	2+2+1
	OR: (i) Plates move slowly over the mantle (1). (ii) Pacific, Eurasian, African, North American, South American, Indian (2). (iii) Convergent (Himalaya), divergent (mid-ocean ridge), transform (San Andreas) (2).	1+2+2
20	(i) Convergent (1). (ii) Himalaya mountains (1). (iii) Earthquakes (1). (iv) They acted as a barrier against invasions and cold winds (2).	1+1+1+2
	OR: (i) Three definitions (2). (ii) Weathering breaks, erosion carries, deposition builds (1). (iii) Caves, valleys; deltas, dunes (2).	2+1+2

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET B

Chapter 3: **Shaping the Earth's Surface** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** lithosphere	broken into plates
2	**(a)** a fluid layer of iron and nickel	generates the magnetic field
3	**(d)** convergent	collision or subduction
4	**(d)** sinks beneath the continental plate	subduction
5	**(d)** erosion	agents of erosion
6	**(c)** oxbow lake	cut-off meander
7	**(c)** cirque	glacial erosion
8	**(d)** glaciers	glacial erosion
9	**(a)** lower crop yields	loss of fertile layer
10	**(a)** bunding, terracing, dams and canals	evidence in texts

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	The rigid outer layer of the Earth including the crust and the upper mantle (2).	2
12	Convergent, divergent and transform (2).	2
13	The sinking of an oceanic plate beneath a continental or another oceanic plate (2).	2
14	The Indian plate collided with the Eurasian plate at a convergent boundary and the crust folded upwards (2).	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Fast flow with strong erosion (1); forms V-shaped valleys, gorges and waterfalls (1); steep slopes (1).	1+1+1
16	Middle: meanders and oxbow lakes (1.5); lower: deposition forms floodplains, levees and deltas (1.5).	1½+1½
17	Floodplains for farming; waterfalls for hydroelectricity; deltas for fishing and settlements (1+1+1).	1+1+1
	OR: Cliffs, caves, stacks and beaches with formation of each (1+1+1).	1+1+1
18	Erosional: cliffs, caves; depositional: beaches, sand bars (3).	3
	OR: Cirques, aretes, U-shaped valleys, hanging valleys (3).	3

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) To conserve water and soil (1). (ii) Bunding, terracing and contouring (1). (iii) Slows runoff and traps sediment (1). (iv) It is low-cost and sustainable (2).	1+1+1+2
	OR: (i) Upper, middle and lower courses (1). (ii) V-valley and waterfall; meanders and oxbow; floodplain, levees, delta (3). (iii) Hydropower, farming, fishing (1).	1+3+1
20	(i) Deposition of sediments at the river mouth (1). (ii) Alluvial deposits (1). (iii) Agriculture and fisheries (1). (iv) Sea-level rise and erosion (2).	1+1+1+2
	OR: (i) Cliffs, caves, beaches, bars (2). (ii) Waves erode, currents move and deposit sediments (2). (iii) Ports, fishing, tourism (1).	2+2+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
