2	The table shows why 100 students were absent from school during a month. Illness is the main reason, with 60 students, which is 60 per cent of the absences. Family functions come next with 25 students, followed by travel with 10 and other causes with 5. The figures show that health is the biggest cause of lost school days. The school can therefore help by promoting hygiene, holding health check-ups and providing nutritious meals. Parents may be asked to plan family events during holidays. If the school and parents work together, attendance can improve and learning will not be interrupted. *(Content 2 · Organisation 1 · Analysis/Interpretation 1 · Language 1)*	5
	OR: The data record 210 vehicles crossing the school gate in one hour. Two-wheelers are the most common at 120, more than half the total. Cars come next with 60, while only 20 cycles and 10 buses were counted. The small number of cycles and buses suggests that students rely on private vehicles, which causes congestion and pollution at the gate. The school may encourage car-pooling and cycling, ask the transport office to add bus routes and mark a separate lane for pedestrians. Such steps will make the area safer and cleaner for students. *(Content 2 · Organisation 1 · Analysis/Interpretation 1 · Language 1)*	5
