Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SCIENCE CHAPTER TEST SET B

Chapter 7: **How do Organisms Reproduce?** | RBSE Board Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Binary fission occurs in: 1

(a) Hydra **(b)** Rhizopus **(c)** yeast **(d)** Amoeba

2. The female reproductive part of a flower is the: 1

(a) anther **(b)** stamen **(c)** sepal **(d)** pistil (carpel)

3. The ovule develops into a ___ after fertilisation. 1

(a) embryo sac **(b)** fruit **(c)** flower **(d)** seed

4. A student states: “Spirogyra reproduces by fragmentation.” The correct response is: 1

(a) Correct **(b)** Incorrect — by spores

(c) Incorrect — it reproduces by budding **(d)** Cannot be determined

5. For a unisexual flower, Student A gives papaya; Student B gives hibiscus. Then: 1

(a) Student A is correct **(b)** Student B is correct

(c) Both are correct **(d)** Both are wrong

6. Leaves of Bryophyllum produce new plants from: 1

(a) seeds **(b)** buds in leaf notches

(c) spores **(d)** roots

7. The tube that carries both urine and sperm in males is the: 1

(a) urethra **(b)** oviduct **(c)** vas deferens **(d)** ureter

8. AIDS is caused by: 1

(a) a protozoan **(b)** a bacterium **(c)** a virus (HIV) **(d)** a fungus

9. The time taken from fertilisation to birth in humans is about: 1

(a) six months **(b)** three months **(c)** twelve months **(d)** nine months

10. The structure that becomes the embryo in a seed is formed from the: 1

(a) stigma **(b)** ovary wall **(c)** pollen grain **(d)** zygote

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. What is pollination? 2

12. Name two methods of artificial vegetative propagation. 2

13. What is the importance of variation for a species? 2

14. A student says that the uterus prepares itself every month to receive a fertilised egg. Justify or refute. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. How does binary fission in Amoeba differ from that in Leishmania? 3

16. What is tissue culture? Write two of its applications. 3

17. How does the embryo get nourishment inside the mother's body? Explain the role of the placenta. 3

OR

What are the different methods of contraception? Give one example of each. 3

18. What is the importance of DNA copying in reproduction? Why are copies not identical? 3

OR

Explain spore formation in Rhizopus with a diagram (describe). 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. (i) Describe sexual reproduction in flowering plants. 5
(ii) Explain the formation of seeds and fruit.
(iii) What is germination?

OR

(i) Explain three methods of asexual reproduction with examples. 5
(ii) Why is asexual reproduction considered faster?

20. **Case study:** Due to rising population, the government promotes family planning and awareness of STDs. 5
(i) Name two STDs caused by viruses.
(ii) Which contraceptive method prevents STDs?
(iii) Why is female foeticide illegal?
(iv) How does a copper-T prevent pregnancy?

OR

(i) What changes occur in boys at puberty? 5
(ii) Name the gametes and where they are formed.
(iii) What is menstruation?

END OF QUESTION PAPER — Total: 40 Marks
