Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET A

Economics Chapter 1: **Development** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** Per capita income	Income is used by the World Bank
2	**(d)** per capita income	Total income divided by population
3	**(b)** high income countries	Classification
4	**(b)** low middle income	About US$ 11,000 in 2024
5	**(c)** Kerala	Kerala 6
6	**(b)** Rs 6000	20000 − 14000 = 6000
7	**(a)** Both A and R are true and R is the correct explanation of A	Collective provision
8	**(c)** UNDP	United Nations Development Programme
9	**(c)** Groundwater	Replenished by nature
10	**(a)** Sri Lanka	Sri Lanka 89

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	It is the average income of a country, obtained by dividing the total income of the country by its total population.	2
12	The number of children that die before the age of one year as a proportion of 1000 live children born in that particular year.	2
13	Development that can be maintained for future generations without exhausting resources or harming the environment; present level of development should not be at the cost of future needs.	2
14	Because their life situations are different and so their aspirations and goals differ; what is development for one may not be for another.	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Averages make comparison easy, e.g. per capita income compares countries of different populations; limitations — hide disparities and do not tell how income is distributed; same average can hide very rich and very poor (Table 1.2).	1+1+1
16	Money cannot buy everything like pollution-free environment, unadulterated medicines, security; many goods like health and education are best provided collectively; non-material factors like respect, freedom and equal treatment matter; Haryana has higher income but lags behind Kerala in IMR and literacy.	1+1+1
17	Per capita income; limitations — averages hide disparities in income distribution; do not show health, education, environment and quality of life.	1+1+1
	OR: UNDP's Human Development Report compares countries on education levels, health status and per capita income; World Bank uses only per capita income.	1+1+1
18	IMR — Haryana 28, Kerala 6, Bihar 27; literacy — 82, 94, 62; net attendance ratio (15–17 years) — 73, 94, 69; Kerala is ahead in all though its per capita income is lower than Haryana.	1+1+1
	OR: Money in the pocket cannot buy all goods and services; Kerala provides adequate basic health and educational facilities collectively and has a well-functioning PDS; income alone does not guarantee quality of life.	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Present development should not harm future generations; groundwater overused in Punjab, Western U.P., urban areas — about 300 districts report decline over 4 metres in 20 years; crude oil is non-renewable and will exhaust; India depends on imports; environmental degradation does not respect boundaries.	5
	OR: Renewable resources are replenished by nature (crops, groundwater) but can be overused if used faster than replenished; non-renewable have a fixed stock that will exhaust (crude oil); new discoveries add to stock but will exhaust too; overuse of groundwater and dependence on crude oil show need for sustainable development.	5

20	Per capita income is useful but not sufficient; Kerala better in IMR, literacy and attendance; income is an important goal as more income means more goods; but health, education, equity matter too; so use income together with other indicators.	5
	OR: UNDP compares countries on health, education and income; Table 1.6 — Sri Lanka best (GNI 12,616, life expectancy 77.5, schooling 10.8, rank 89); India GNI 9,047, life expectancy 72, rank 130; Pakistan rank 168; Nepal and Bangladesh have lower income but better life expectancy than India; the word 'Human' stresses people's well-being.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

ANSWER KEY & MARKING SCHEME SET B

Economics Chapter 1: **Development** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** Higher support prices for crops	Support prices matter to prosperous farmers
2	**(d)** low income countries	Low income
3	**(d)** Rs 3,25,759	Table 1.3
4	**(c)** 15–17 years	Secondary stage
5	**(a)** Both have the same average income but A is more equitable	Average = Rs 10,000 each
6	**(a)** Both A and R are true and R is the correct explanation of A	Averages hide disparities
7	**(c)** Crude oil	Fixed stock
8	**(a)** 193	Out of 193
9	**(a)** Population density	Three indicators
10	**(c)** Tamil Nadu	90% rural people use ration shops

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	It measures the proportion of the literate population in the 7-and-above age group.	2
12	The average expected length of life of a person at the time of birth.	2
13	Equal treatment, freedom, security, respect of others, friendship, job security, safe environment (any two).	1+1
14	Total income is not useful as countries differ in population; average income tells what an average person is likely to earn, and higher income means more of the things people need.	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Collective security for a locality; schools and health centres; clean water and sanitation; roads and public transport; PDS (any three with reason).	1+1+1
16	Different persons seek different things and what is development for one may be destructive for another; industrialists want more dams for electricity, but tribals are displaced and prefer small check dams; a girl wants equal freedom but her brother may not like it.	1+1+1
17	Natural resources like groundwater and crude oil are being overused or exhausted; environmental degradation harms future generations; 'we have borrowed the world from our children'.	1+1+1
	OR: Crude oil reserves will last only about 50 years at present rates; India imports oil; groundwater: one-third of the country overuses it and 60 per cent may do so in 25 years.	1+1+1
18	GNI per capita 12,616, 9,047, 5,501; life expectancy 77.5, 72, 67.6; mean schooling 10.8, 6.9, 4.3; HDI rank 89, 130, 168; Sri Lanka is ahead of India in every respect.	1+1+1
	OR: Bangladesh has a lower GNI per capita (8,498) than India (9,047) but a higher life expectancy (74.7 against 72) and similar mean schooling and the same HDI rank (130); this shows income alone does not decide human development.	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Landless labourers want more work, better wages and no discrimination; prosperous Punjab farmers want assured high prices and cheap labour; rural woman wants freedom; urban unemployed youth want jobs; rich urban girl wants freedom and studies abroad; adivasi of Narmada valley fears displacement; goals differ and may conflict; people seek income and also equal treatment, freedom, security and respect.	5
	OR: National development means asking what is fair and just for all, whether an idea benefits many or few; different persons have different and conflicting notions based on their situations; need to decide through democratic process which path is better.	5

20	Averages allow comparison between countries and states with different populations; limitations — hide disparities; Table 1.2: both countries average Rs 10,000 but A has equal incomes while B has four people with Rs 500 and one with Rs 48,000; rising average does not mean all sections have gained.	5
	OR: More income means more goods and services; Haryana highest income, Bihar lowest; but IMR of Haryana is 28 vs Kerala's 6; literacy 82 vs 94; Bihar attendance ratio 69; money cannot buy pollution-free environment or collective facilities; hence health, education indicators needed.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
