THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET A

Geography Chapters 1 & 2: **Resources and Development, Forest and Wildlife Resources** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** minerals	Exhaustible
2	**(c)** community-owned resources	Ownership
3	**(d)** international institutions	Open ocean
4	**(c)** A is true but R is false	R is false — resources are a function of human activities
5	**(b)** stock	Lack of technology
6	**(d)** Narak, the creator of music	Harmony with nature
7	**(a)** plastic	Ecological diversity
8	**(b)** aquatic biodiversity	Conservation
9	**(a)** Both A and R are true and R is the correct explanation of A	Led to 1972 Act
10	**(c)** Uttarakhand	Tiger reserve

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Resources that can be renewed or reproduced by physical, chemical or mechanical processes; solar energy, wind, water, forests and wildlife.	2
12	Materials in the environment which have the potential to satisfy human needs but humans do not have the appropriate technology to access them, e.g. hydrogen and oxygen in water as energy.	2
13	Reserved and protected forests maintained for producing timber and other forest produce and for protective reasons.	2
14	Reserved forests and protected forests.	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Rich resources in colonies attracted invaders; higher technology of colonisers helped exploit them; resources contribute to development only with technology and institutional changes; India experienced this during colonisation — so planning must include technology, human resources and history.	3
16	Tiger is a key species; protecting its habitat protects the entire ecosystem with prey species and plants; tiger conservation preserves large biotypes, not only one species.	3
17	Potential: found in a region but not yet utilised — wind and solar energy of Rajasthan and Gujarat; Developed: surveyed, quality and quantity determined, utilised with technology and feasibility.	1½+1½
	OR: Develop on crystalline igneous rocks in low-rainfall areas of eastern and southern Deccan plateau; parts of Odisha, Chhattisgarh, southern middle Ganga plain, piedmont of Western Ghats; reddish due to iron diffusion; yellow when hydrated.	3
18	Bishnoi villages protect blackbuck, nilgai and peacocks; communities revere trees, springs, mountain peaks; monkeys fed around temples; sacred groves left untouched.	3
	OR: Villagers hugged trees to resist felling; successfully resisted deforestation in several Himalayan areas; showed community afforestation with indigenous species can be enormously successful.	3

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Potential — wind and solar in Rajasthan, Gujarat; Developed — surveyed, utilised; Stock — hydrogen as energy needing technology; Reserves — subset of stock usable with present technology, e.g. water in dams, forests used in future; importance for planning.	5
	OR: Categories — forests, not available for cultivation, other uncultivated land, fallow, net sown area; data for 93 per cent; physical factors — topography, climate, soil; human factors — population density, technology, culture; regional variation in NSA.	5

20	Provisions — list of protected species, ban on hunting, habitat protection, trade restrictions; national parks and sanctuaries; special projects; elephants, black buck, godawan, snow leopard; insects (1980, 1986) and plants (1991); shift to biodiversity conservation.	5
	OR: Sariska, Alwar's Sonchuri, Chipko, Beej Bachao Andolan, Navdanya, Bishnois, sacred groves, JFM since 1988 in Odisha; need for community decision-making.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET B

Geography Chapters 1 & 2: **Resources and Development, Forest and Wildlife Resources** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** reserves	Subset of stock
2	**(d)** 1968	International level
3	**(a)** Punjab and Haryana	Less than 10% in NE states
4	**(d)** 33 per cent of geographical area	Ecological balance
5	**(c)** deforestation due to mining	Mining
6	**(c)** Kerala	South India
7	**(b)** Madhya Pradesh	Tiger reserve
8	**(b)** Assam	North-east
9	**(d)** the Gharial	Endangered reptiles
10	**(b)** dragonfly	Insects in conservation

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	We live on land, perform economic activities on it; it supports natural vegetation, wildlife, human life, transport and communication; it is of finite magnitude.	2
12	Steps cut on slopes to make terraces, which restrict erosion; western and central Himalayas.	2
13	Conservation projects began focusing on biodiversity as a whole rather than on a few components; insects play important ecological roles.	2
14	They provide habitat to about two-thirds of the surviving tiger population of the world.	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Hilly terrain, dense forests, poor soil, shifting cultivation and low population density in north-eastern states and Andaman & Nicobar; less than 10 per cent in Arunachal, Mizoram, Manipur.	3
16	Vast resources; forests owned by government, individuals and communities; dependence of millions of people on forests; encroachment and poaching; diverse categories of forests.	3
17	Grazing pressure on remaining land; overgrazing leads to land degradation; difficulty feeding large cattle population; loss of vegetation cover and soil erosion.	3
	OR: Humans interact with nature through technology and create institutions for development; they transform materials into resources; human beings themselves are resources; demand determined by need.	3
18	Reserved — declared by government, most valuable for conservation, more than half of forest land; Unclassed — other forests and wastelands belonging to government, individuals and communities; found in NE states and parts of Gujarat.	1½+1½
	OR: Banning hunting; legal protection to habitats; restricting trade; all-India list of protected species; projects for tiger, rhino, hangul, crocodiles, Asiatic lion.	3

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Plains 43 per cent — agriculture and industry; mountains 30 per cent — perennial rivers, tourism, ecology; plateau 27 per cent — minerals, fossil fuels, forests; land supports all human activities; need for careful planning.	5
	OR: Medium of plant growth; supports living organisms; living system; takes millions of years; factors — relief, parent rock, climate, vegetation, time; forces — temperature change, running water, wind, glaciers, decomposers; chemical and organic changes; soil profile.	5
20	Forests as primary producers; quality of air, water and soil; food, medicines, timber, fuel; livelihoods of forest communities; genetic diversity for agriculture and fisheries; cultural and religious value; ecological balance.	5

	OR: Reserved (over half), protected (one-third), unclassed; permanent forest estates; MP largest (75 per cent of its forest area); states with reserved and protected forests; NE and Gujarat unclassed.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET C

Geography Chapters 1 & 2: **Resources and Development, Forest and Wildlife Resources** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** laterite soil	Latin 'later' = brick
2	**(a)** Both A and R are true and R is the correct explanation of A	Clayey texture
3	**(d)** Chambal	Bad lands
4	**(a)** top soil, subsoil, substratum, unweathered parent rock	Fig. 1.5
5	**(d)** coarse alluvial soils	Near break of slope
6	**(c)** Odisha	JFM
7	**(a)** Both A and R are true and R is the correct explanation of A	Successful protection
8	**(a)** tamarind and mango	Sacred trees
9	**(b)** Kerala	Also J&K, AP, Uttarakhand, TN, WB, Maharashtra
10	**(d)** all north-eastern states and parts of Gujarat	Managed by communities

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Population density, technological capability, culture and traditions.	2
12	In snow-covered areas these soils experience denudation and are acidic with low humus content.	2
13	Intermediary benefits like non-timber forest produce and a share in the timber harvested by successful protection.	2
14	It is famous for the one-horned rhinoceros and deer; important for conserving endangered species.	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Depletion for satisfying the greed of a few; accumulation in few hands — haves and have-nots; global ecological crises — global warming, ozone depletion, pollution, land degradation.	3
16	Livelihood from forest produce — fuel, fodder, minor forest produce, medicines; employment; protection of soil and water; cultural and religious value.	3
17	Industrial effluents as waste pollute land and water; mining leaves scars and over-burdening; dust from cement and ceramic industries; remedies — treatment of effluents before discharge, control of mining, proper waste management.	3
	OR: Sustainable existence of all forms of life depends on resource planning and equitable distribution; without it the future of the planet is in danger; it ensures resources for present and future generations.	3
18	Five villages declared 1,200 hectares of forest as Bhairodev Dakav Sonchuri, framed their own rules disallowing hunting and protected wildlife from outside encroachment, rejecting government involvement.	3
	OR: Farmers' and citizens' groups showed that diversified crop production without synthetic chemicals is possible and economically viable; revival of traditional and ecological farming.	3

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Equitable distribution; avoid depletion; resource planning in India since First Five Year Plan; identification, planning structure, matching with national plans; conservation; Gandhiji's view; Brundtland Report; Rio Summit.	5
	OR: Laterite — tropical/subtropical with alternate wet and dry seasons, intense leaching, acidic, nutrient-deficient, deep; tea, coffee, cashew. Arid — dry climate, high temperature, red to brown, sandy, saline, lacks humus and moisture, kankar; cultivable with irrigation (western Rajasthan).	5
20	Tiger numbers fell from 55,000 to 1,827; poaching, habitat loss; launched 1973; objectives — saving species and biotypes; reserves in Uttarakhand, West Bengal, MP, Rajasthan, Assam, Kerala.	5

	OR: Patches of forest dedicated to gods; untouched; preserve rare species; tree worship — mahua, kadamba, tamarind, mango, peepal, banyan; springs, mountain peaks protected; animals near temples; Bishnois.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET D

Geography Chapters 1 & 2: **Resources and Development, Forest and Wildlife Resources** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** current fallow	Fallow lands
2	**(b)** population density	Also vegetation and time
3	**(b)** western India	Rows of trees
4	**(c)** arid soil	Saline
5	**(d)** retards infiltration of water into soil	Land degradation
6	**(a)** traditional conservation through religious beliefs	Fed daily
7	**(a)** Gautama Buddha	487 B.C.
8	**(d)** chinkara	As per the text
9	**(a)** primary producers	All depend on them
10	**(d)** biological diversity	Vast biodiversity

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Rocky, arid and desert areas; land put to other non-agricultural uses includes settlements, roads, railways, industry.	2
12	It contains adequate proportions of potash, phosphoric acid and lime and is renewed by river deposits.	2
13	Traditional crop varieties preserve genes for better growth and breeding of crops and resistance.	2
14	Indian elephant, black buck (chinkara), great Indian bustard (godawan) and snow leopard.	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Found in hilly and mountainous areas with rain forests; loamy and silty on valley sides, coarse on upper slopes; acidic with low humus in snow areas; fertile on river terraces and alluvial fans in lower valleys.	3
16	Local communities everywhere have to be involved in natural resource management; development must be people-centric, environment-friendly and economically rewarding.	3
17	Not available: barren and waste land; land put to non-agricultural uses — buildings, roads, factories. Fallow: current fallow (one year or less) and other than current fallow (1–5 years).	1½+1½
	OR: Soil takes millions of years to form, supports plant growth and living organisms; methods — strip cropping, shelter belts, avoiding wrong ploughing, afforestation.	3
18	Protected — Bihar, Haryana, Punjab, Himachal Pradesh, Odisha, Rajasthan; Reserved — J&K, Andhra Pradesh, Uttarakhand, Kerala, Tamil Nadu, West Bengal, Maharashtra.	3
	OR: It shows devotion to nature — gathering music from springs, rivers, mountains, forests, insects, animals and breeze; reflects harmony and dependence on nature.	3

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Deforestation for mining (Jharkhand, Chhattisgarh, MP, Odisha); overgrazing (Gujarat, Rajasthan, MP, Maharashtra); over-irrigation and waterlogging (Punjab, Haryana, western UP); mineral processing dust; industrial effluents; 95 per cent of basic needs from land.	5
	OR: Club of Rome (1968); Schumacher's 'Small is Beautiful' (1974); Brundtland Commission Report (1987) — sustainable development, 'Our Common Future'; Rio Earth Summit (1992) — Declaration on Climatic Change and Biodiversity, Forest Principles, Agenda 21.	5
20	One-horned rhinoceros, Kashmir stag (hangul), three types of crocodiles, Asiatic lion; Indian elephant, black buck, great Indian bustard, snow leopard; insects and plants; Kaziranga.	5

	OR: Strict implementation of laws; protected areas; community participation (JFM, Chipko); afforestation with indigenous species; checking poaching and illegal trade; awareness; ecological farming; people-centric development.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
