ANSWER KEY & MARKING SCHEME SET A

Geography Chapters 3 & 4: **Water Resources, Agriculture** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** three-fourth	Small proportion freshwater
2	**(a)** surface run off and groundwater	Hydrological cycle
3	**(c)** 55 litres per capita per day	Ease of living
4	**(a)** Both A and R are true and R is the correct explanation of A	Quality and access
5	**(c)** seven	Water-stressed blocks
6	**(b)** two-thirds	Agriculturally important country
7	**(c)** Mexico and Central America	World names
8	**(d)** Indonesia	World names
9	**(b)** Both A and R are true but R is not the correct explanation of A	Both true; R doesn't explain A
10	**(b)** April to June	Summer

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Expand cultivable area under assured irrigation (har khet ko pani); improve on-farm water use efficiency (per drop more crop); introduce sustainable water conservation practices.	2
12	Objections raised by Karnataka and Andhra Pradesh to the diversion of more water at Koyna by Maharashtra for a multipurpose project, reducing downstream flow.	2
13	Produce of plantations is used as raw material in industries and plantations need capital-intensive inputs and processing like industries.	2
14	Use of higher doses of modern inputs like HYV seeds, chemical fertilisers, insecticides and pesticides to obtain higher productivity for the market.	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Intensive industrialisation and urbanisation; more industries needing water and power; growing urban population and lifestyles; over-exploitation of groundwater by housing societies.	3
16	Provides livelihood to about two-thirds of population; produces most of our food; raw material for industries (cotton, jute, sugarcane); export products like tea, coffee, spices.	3
17	It is socio-economically and environmentally sound; uses local knowledge of rainfall and soil; cheap; decentralised; no displacement; recharges groundwater; examples — tankas, kuls, rooftop harvesting.	3
	OR: Poor sediment flow and excessive sedimentation; rockier stream beds; poorer habitats; fragmented rivers prevent migration for spawning.	3
18	Primitive — small patches, primitive tools, family labour, slash and burn, low productivity, for family; commercial — large scale, modern inputs, HYV seeds, fertilisers, for market, high productivity.	3
	OR: Equatorial crop also grown in tropical and subtropical areas under special conditions; moist and humid climate; rainfall more than 200 cm; temperature above 25°C; important industrial raw material.	3

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Three-fourths of earth covered with water but little freshwater; variation in rainfall; overuse and unequal access; cities with ample water face scarcity; pollution by domestic and industrial wastes; Kolkata floods and drinking water problem; falling groundwater; need for JJM and conservation.	5
	OR: Kuls, rooftop harvesting, inundation channels, khadins, johads, tankas, bamboo drip; based on local ecology; cheap and sustainable; revival needed because of failure of large projects and groundwater crisis; modern adaptations in Karnataka, Meghalaya, Tamil Nadu.	5

20	Primitive subsistence — slash and burn, primitive tools, regional names; intensive subsistence — high population pressure, labour-intensive, biochemical inputs, irrigation; commercial — HYV seeds, fertilisers, market-oriented; plantation — single crop on large area, capital-intensive, migrant labour, tea, coffee, rubber, sugarcane, banana.	5
	OR: Rice — kharif, above 25°C, high humidity, over 100 cm rainfall or irrigation; plains, coastal areas, deltas; WB, UP, Punjab, Odisha, AP; Wheat — rabi, cool season, bright sunshine at ripening, 50–75 cm rainfall; Ganga-Satluj plains and Deccan black soil; Punjab, Haryana, UP, MP, Bihar, Rajasthan.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET B

Geography Chapters 3 & 4: **Water Resources, Agriculture** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** Punjab	Also Maharashtra
2	**(b)** Siri Fort area	Allauddin Khalji
3	**(b)** Andhra Pradesh	Ancient hydraulics
4	**(b)** They lead to large-scale displacement and loss of livelihood	Exercise question
5	**(a)** silt, a natural fertiliser	Land degradation
6	**(a)** sugarcane	Not fitting one season
7	**(b)** Karnataka, Madhya Pradesh, Uttar Pradesh and Bihar	Also AP, Telangana
8	**(c)** arhar	Except arhar
9	**(b)** Brazil	Gur, khandsari, molasses
10	**(b)** half	Kharif crop

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	They block the river's flow, making it difficult for aquatic fauna to migrate, especially for spawning.	2
12	Over-exploitation through wells and tube-wells for irrigation and by urban housing societies and industries.	2
13	Right of inheritance divides land into uneconomical holdings, and farmers have no alternative source of livelihood, so they take maximum output from limited land.	2
14	Kharif crop; temperature between 21°C and 27°C; grows well in old alluvial soil.	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Rooftop water collected using PVC pipe; filtered using sand and bricks; underground pipe takes water to a sump for immediate use; excess water taken to a well; water from the well recharges underground water; water taken from well later.	3
16	Despite development of irrigation, most farmers in large parts of the country depend upon monsoon and natural fertility; lack of irrigation facilities and capital.	3
17	Agricultural fields in arid and semi-arid regions converted into rain-fed storage structures; allowed water to stand and moisten the soil; khadins in Jaisalmer, johads in other parts of Rajasthan.	3
	OR: It narrates the troubles faced by people owing to the floods of the Damodar ('river of sorrow'); shows the need for flood control through projects like DVC.	3
18	India largest producer and consumer; tur (arhar), urad, moong, masur, peas, gram; need less moisture, survive in dry conditions; leguminous — fix nitrogen; major source of protein; MP, Rajasthan, Maharashtra, UP, Karnataka.	3
	OR: Production is mainly for the market; a well-developed network connecting plantation areas, processing industries and markets is needed for timely movement of produce.	3

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Merits — irrigation, electricity, water supply, flood control, navigation, fisheries (Bhakra-Nangal, Hirakud, Sardar Sarovar); demerits — ecological damage, displacement, sedimentation and floods, earthquakes, salinisation, disputes.	5
	OR: Agriculture — irrigated dry-season farming, wells and tube-wells; industries — heavy water users and hydel power; urbanisation — dense populations, lifestyles, housing societies' pumps; overall over-exploitation and pollution.	5
20	Cotton — black soil, 210 frost-free days, India second after China; jute — golden fibre, flood plains of WB, Bihar, Assam, Odisha, Meghalaya; hemp; natural silk — sericulture, mulberry.	5

	OR: Jowar, bajra, ragi — coarse grains with high nutrition, dry regions; pulses — protein, nitrogen fixation, crop rotation, less water; producing states; food security in rain-fed areas.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET C

Geography Chapters 3 & 4: **Water Resources, Agriculture** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** drinking water	Rooftop harvesting
2	**(b)** Both A and R are true but R is not the correct explanation of A	Both true; R is a feature, not the reason
3	**(b)** 15–25 per cent	Rooftop practice
4	**(c)** Mysuru, Karnataka	200 households
5	**(a)** sedimentation in the reservoir	Ironic effect
6	**(c)** mustard	Linseed too
7	**(a)** Both A and R are true and R is the correct explanation of A	Plantation feature
8	**(c)** horticulture crops	Fruits
9	**(b)** Kerala, Tamil Nadu, Karnataka, A&N Islands and Garo hills	Moist humid climate
10	**(c)** natural silk	Silk from cocoons

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	An approach in which the many uses of impounded water — irrigation, power, water supply, flood control, navigation — are integrated with one another.	2
12	Bhakra-Nangal — Sutlej; Hirakud — Mahanadi; Sardar Sarovar — Narmada (any two).	2
13	Kisan Credit Card (KCC) and Personal Accident Insurance Scheme (PAIS).	2
14	To check the exploitation of farmers by speculators and middlemen and assure them a fair price.	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	To safeguard against health hazards; to ensure food security and continuation of livelihoods and productive activities; to prevent degradation of natural ecosystems.	3
16	Tropical and subtropical; hot and humid climate; 21°C–27°C; 75–100 cm rainfall; irrigation needed in low rainfall areas; variety of soils; manual labour from sowing to harvesting.	3
17	Annual rainfall 1,000 mm; 80 per cent collection efficiency and about 10 fillings; every house collects about 50,000 litres annually; about 200 households; village known as rich in rainwater.	3
	OR: Jal Jeevan Mission for piped water; Atal Bhujal Yojana for groundwater management; PMKSY for irrigation efficiency; multi-purpose projects; mandatory rainwater harvesting laws.	3
18	Green Revolution — HYV seeds, fertilisers, irrigation increased food grain production in Punjab, Haryana, western UP; White Revolution (Operation Flood) increased milk production; both concentrated in selected areas.	3
	OR: In 2020 India second largest producer of groundnut after China; about 12 per cent of cropped area; groundnut kharif — Gujarat, Rajasthan, TN; linseed and mustard rabi; sesamum kharif in north, rabi in south; castor both seasons.	3

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Jal Jeevan Mission — tap water to every rural household at 55 lpcd; Atal Bhujal Yojana — 8,220 gram panchayats in 80 districts of seven states, behavioural change; PMKSY — har khet ko pani, per drop more crop; objectives and significance.	5
	OR: Rajasthan — tankas in Bikaner, Phalodi, Barmer; rooftop systems; palar pani; khadins; johads; decline with Indira Gandhi Canal; Meghalaya — Shillong rooftop harvesting; bamboo drip irrigation, 200 years old, springs to plants.	5

20	Variety of food and fibre crops, vegetables, fruits, spices; rabi, kharif, zaid seasons; regional patterns — wheat in north-west, rice in east and south, cotton on black soil, tea in Assam, coffee in Karnataka, millets in dry areas.	5
	OR: Land reforms; crop insurance; Grameen banks and cooperatives; KCC; PAIS; weather bulletins; MSP and procurement prices; Farmers' Portal; Green and White Revolution; irrigation schemes.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET D

Geography Chapters 3 & 4: **Water Resources, Agriculture** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** western Rajasthan	Decline of tankas
2	**(c)** tube-wells	Modern
3	**(d)** over or through which water is intended to flow	Dam structure
4	**(a)** aggravated the problem of water scarcity	Dense population
5	**(b)** all agricultural farms	Har khet ko pani
6	**(a)** the cotton plant	Cotton
7	**(c)** Operation Flood (milk)	Dairy
8	**(b)** Kisan Credit Card	Institutional reform
9	**(d)** 60 per cent	Needs reforms
10	**(b)** the right of inheritance	Uneconomical holdings

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	They pollute water bodies and groundwater, making water hazardous for human use.	2
12	They kept the rooms cool and helped beat the summer heat.	2
13	Three crops of paddy grown in a year in Assam, West Bengal and Odisha.	2
14	West Bengal, Uttar Pradesh, Punjab, Andhra Pradesh, Odisha, Assam (any two).	2

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Hilly — diversion channels (guls/kuls) leading to village tanks in Western Himalayas; arid — rooftop harvesting with tankas, khadins and johads to store rainwater.	1½+1½
16	Growing population; farmers dependent on monsoon; low productivity; small holdings; need for modern inputs, irrigation, mechanisation, credit and insurance.	3
17	Hilly terrain, runoff, growing urban demand and limited storage; hence nearly every household has rooftop harvesting.	3
	OR: Large-scale displacement of local communities; loss of livelihood; benefits go mainly to landowners and urban industries; inter-state disputes over sharing water.	3
18	Mangoes — Maharashtra, AP, Telangana, UP, WB; oranges — Nagpur, Cherrapunjee; bananas — Kerala, Mizoram, Maharashtra, TN; lichi and guava — UP, Bihar; pineapples — Meghalaya; grapes — AP, Telangana, Maharashtra; apples, pears, apricots, walnuts — J&K and HP.	3
	OR: Black cotton soil retains moisture; high temperature, light rainfall or irrigation, 210 frost-free days and bright sunshine available.	3

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Growing demand and conflicts; dams serve many uses; but ecological costs; integration of large projects with local harvesting, groundwater recharge, efficient irrigation and pollution control.	5
	OR: Expansion of irrigated areas for dry-season agriculture; tube-wells cause falling groundwater; water-intensive commercial crops; measures — drought-resistant crops, dry farming, drip and sprinkler irrigation, PMKSY, crop diversification, rainwater harvesting.	5
20	Cotton — drier black soil, high temperature, light rainfall, 210 frost-free days, 6–8 months; jute — fertile flood plain soils renewed annually, high temperature, humid; states for each; uses.	5
	OR: Commercial, export earnings (tea, coffee); raw material for industries (rubber, sugarcane); employment of migrant labour; interface of agriculture and industry; developed transport network; Assam tea, Karnataka coffee, Kerala rubber.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
