THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET A

Geography Chapters 1, 2, 3, 4: **Resources and Development, Forest and Wildlife Resources, Water Resources, Agriculture**

| Class 10 Social Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 12 × 1 = 12

Q.	Correct Option	Brief Reasoning
1	**(a)** Schumacher	Resource conservation
2	**(a)** Both A and R are true and R is the correct explanation of A	Reporting area
3	**(a)** 30 per cent	Perennial rivers, tourism
4	**(a)** reserved forests	Most valuable for conservation
5	**(b)** Both A and R are true but R is not the correct explanation of A	Both true; R doesn't explain why MP has the largest area
6	**(a)** two-thirds	Prime targets for poaching
7	**(d)** 11th century	Ancient hydraulic structures
8	**(b)** Tamil Nadu	Legal provisions
9	**(a)** tankas	Rooftop rainwater harvesting
10	**(b)** Andhra Pradesh	Regional names
11	**(b)** China	Staple food
12	**(b)** western temperate cyclones	Winter rain

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
13	Everything available in our environment which can be used to satisfy our needs, provided it is technologically accessible, economically feasible and culturally acceptable.	2
14	Almost one-third of the total forest area declared by the Forest Department, which is protected from any further depletion.	2
15	Forests (plants) make their own food and all other living beings depend on them; they play a key role in the ecological system.	2
16	Channels developed by people in the flood plains of Bengal to irrigate their fields.	2
17	The voluntary donation of land to the landless; started when Shri Ram Chandra Reddy offered 80 acres at Pochampally in response to Vinoba Bhave's appeal.	2

SECTION — C (Short Answer) — Answers — 6 × 3 = 18

Q.	Expected Answer / Value Points	Marks
18	The denudation of the soil cover and subsequent washing down; gully erosion — running water cuts deep channels; sheet erosion — water flows as a sheet and washes away top soil; wind erosion — wind blows loose soil off flat or sloping land.	1+2
19	Virgin forests preserved due to nature worship and left untouched by local people; Mundas and Santhals worship mahua and kadamba; tribals of Odisha and Bihar worship tamarind and mango trees during weddings; peepal and banyan considered sacred.	1+2
20	Farmers shifted to water-intensive and commercial crops; this has great ecological consequences like salinisation of soil; social disparities between rich landowners and landless poor; falling groundwater levels.	3
21	It was based on package technology requiring irrigation and capital; adopted mainly in Punjab, Haryana, western UP and parts of Rajasthan; other regions with rain-fed agriculture lagged behind; hence a comprehensive land development programme was started later.	3
22	Tea — tropical and subtropical climate; deep and fertile well-drained soil rich in humus and organic matter; warm and moist frost-free climate all through the year; frequent showers evenly distributed; abundant cheap and skilled labour.	1+2
	OR: They are coarse but have very high nutritional value; jowar — Maharashtra, Karnataka, AP, MP; bajra — Rajasthan, UP, Maharashtra, Gujarat, Haryana; ragi — Karnataka, Tamil Nadu, HP, Uttarakhand, Sikkim, Jharkhand, Arunachal.	3

23	More than 100 heads of states met to address urgent problems of environmental protection and socio-economic development; signed the Declaration on Global Climatic Change and Biological Diversity; endorsed global Forest Principles; adopted Agenda 21 for sustainable development in the 21st century.	3
	OR: Maharashtra, Madhya Pradesh, Gujarat (Saurashtra), Chhattisgarh; cotton. Features: made of clayey material, high moisture-holding capacity, rich in calcium carbonate, magnesium, potash and lime; develops deep cracks in hot weather.	1+1+1

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
24	Owned or managed by government through the Forest Department; reserved (over half), protected (one-third), unclassed; permanent forest estates for timber and protection; MP has largest area under permanent forests (75 per cent of its forest area); J&K, Andhra Pradesh, Uttarakhand, Kerala, Tamil Nadu, West Bengal, Maharashtra — large reserved forests; Bihar, Haryana, Punjab, HP, Odisha, Rajasthan — protected forests; NE states and parts of Gujarat — unclassed forests managed by local communities.	5
	OR: Wildlife (Protection) Act 1972 — list of protected species, ban on hunting, habitat protection, trade restrictions; national parks and wildlife sanctuaries; projects for tiger, rhino, hangul, crocodiles, Asiatic lion; Indian elephant, black buck, great Indian bustard, snow leopard protected; insects and plants added to protected lists (1980, 1986, 1991); JFM.	5
25	Commercial farming where a single crop is grown on a large area; interface of agriculture and industry; large tracts, capital-intensive inputs, migrant labour; produce used as raw material in industries; well-developed transport and communication network; tea in Assam and North Bengal, coffee in Karnataka; rubber, sugarcane, banana.	5
	OR: Vinoba Bhave, Gandhiji's spiritual heir, undertook padyatra; at Pochampally (Telangana) landless villagers demanded land; Shri Ram Chandra Reddy offered 80 acres for 80 landless villagers — Bhoodan; some zamindars offered entire villages — Gramdan; some landowners gave land due to fear of land ceiling act; called the Blood-less Revolution; promoted land redistribution peacefully.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTER

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET B

Geography Chapters 1, 2, 3, 4: **Resources and Development, Forest and Wildlife Resources, Water Resources, Agriculture**

| Class 10 Social Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 12 × 1 = 12

Q.	Correct Option	Brief Reasoning
1	**(c)** renewable and non-renewable	Classification
2	**(c)** Rio de Janeiro	Agenda 21
3	**(a)** 43 per cent	Mountains 30%, plateau 27%
4	**(a)** patches of forests left untouched by local people due to religious beliefs	Forests of gods and goddesses
5	**(c)** plants	Six species
6	**(c)** 1972	Protecting habitats
7	**(b)** 20–80 drops per minute	At the plant site
8	**(a)** hydrological cycle	All water moves in the cycle
9	**(d)** Meghalaya	Streams and springs
10	**(a)** jowar	Rain-fed crop
11	**(c)** 200 cm	Equatorial crop
12	**(a)** pulses	Fixes nitrogen

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
13	Land made unfit for cultivation by gully erosion caused by running water; ravines.	1+1
14	Forests regarded as the most valuable for conservation of forest and wildlife resources; more than half of the total forest land in India.	2
15	Plenty of water is now available due to the perennial Indira Gandhi Canal.	2
16	Rainwater, as it is commonly referred to in western Rajasthan; considered the purest form of natural water.	2
17	Rabi, kharif and zaid.	2

SECTION — C (Short Answer) — Answers — 6 × 3 = 18

Q.	Expected Answer / Value Points	Marks
18	Irrational consumption and over-utilisation lead to socio-economic and environmental problems; resources are finite; Gandhiji: 'There is enough for everybody's need and not for anybody's greed' — he blamed greedy individuals and exploitative technology, and wanted production by the masses instead of mass production.	1+2
19	Sariska villagers fought against mining citing the Wildlife Protection Act; five villages of Alwar declared 1,200 hectares as Bhairodev Dakav 'Sonchuri'; Chipko movement in the Himalayas; Beej Bachao Andolan in Tehri and Navdanya; Bishnoi villages protect blackbuck, nilgai and peacocks; sacred groves.	3
20	Sedimentation in reservoirs reduces their capacity; big dams have mostly been unsuccessful in controlling floods during excessive rainfall; release of water causes floods downstream; floods cause soil erosion.	3
21	Collectivisation, consolidation of holdings, cooperation, abolition of zamindari; land reforms in First Five Year Plan; crop insurance; Grameen banks, cooperative societies and banks for cheap loans; Kisan Credit Card; Personal Accident Insurance Scheme; weather bulletins on radio and TV; minimum support price.	3
22	Resources are not free gifts of nature; human beings transform materials in the environment into resources through technology and institutions; human beings themselves are essential components of resources; interactive relationship between nature, technology and institutions.	3
	OR: Individual — owned privately by individuals (plots, houses); Community-owned — accessible to all members of the community (grazing grounds, ponds, parks); National — all resources within political boundaries and oceanic area up to 12 nautical miles; International — regulated by international institutions, e.g. oceanic resources beyond 200 nautical miles (Exclusive Economic Zone).	3

23	Formal existence since 1988 when Odisha passed the first resolution; depends on local village institutions undertaking protection of degraded forest land managed by the forest department; in return they get non-timber forest produce and a share in timber harvested by 'successful protection'.	3
	OR: Insensitivity to the environment; expansion of agriculture, mining and industries; hunting and poaching; habitat destruction; growing population and developmental projects put forests and wildlife under great stress.	3

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
24	Continuous use of land without proper conservation results in degradation. Causes: deforestation, overgrazing, mining, over-irrigation, industrial effluents, mineral dust. Measures: afforestation; proper management of grazing; planting of shelter belts; stabilisation of sand dunes with thorny bushes; proper management of waste lands; control of mining; proper discharge and treatment of industrial effluents and wastes.	2+3
	OR: Technology made resources accessible and economically feasible; industrialisation and urbanisation increased demand; mass production, consumerism; greed of a few individuals and countries; depletion of resources, accumulation in few hands, global ecological crises — global warming, ozone depletion, pollution, land degradation; hence the need for sustainable development and resource planning.	5
25	Variations in seasonal and annual precipitation; over-exploitation; growing population; irrigation expansion for food; falling groundwater due to wells and tube-wells; industrialisation and urbanisation; pollution; need — safeguard health, ensure food security, continuation of livelihoods and productive activities, prevent degradation of ecosystems.	5
	OR: Individual — avoid wastage, fix leaks, reuse water; community — rooftop rainwater harvesting, recharge of dugwells, revival of traditional systems (tankas, johads); government — Jal Jeevan Mission, Atal Bhujal Yojana, PMKSY ('per drop more crop'), mandatory rainwater harvesting (Tamil Nadu), drought-resistant crops and dry farming.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTER

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET C

Geography Chapters 1, 2, 3, 4: **Resources and Development, Forest and Wildlife Resources, Water Resources, Agriculture**

| Class 10 Social Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 12 × 1 = 12

Q.	Correct Option	Brief Reasoning
1	**(b)** developed resources	Status of development
2	**(c)** tea, coffee and cashew nut	With conservation techniques
3	**(d)** Jharkhand	Also Chhattisgarh and MP
4	**(c)** Odisha	Village institutions
5	**(d)** 1973	Tiger population had fallen to 1,827
6	**(b)** unclassed forests	NE states
7	**(a)** Sutlej–Beas river basin	Hydel power and irrigation
8	**(b)** rain-fed storage structures in Rajasthan	Arid and semi-arid regions
9	**(b)** Narmada	Gujarat
10	**(c)** gram	Sown October–December
11	**(a)** cotton	Black soil of Deccan
12	**(c)** Gujarat	Followed by Rajasthan and TN

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
13	Depletion of resources for the greed of a few; accumulation of resources in few hands (rich and poor); global ecological crises like global warming, ozone depletion, pollution, land degradation (any two).	2
14	A farmers' and citizens' movement in Tehri showing that diversified crop production without synthetic chemicals is possible and economically viable.	2
15	It cleans the roofs and the pipes; only rainwater from subsequent showers is collected.	2
16	Farming on small patches of land with primitive tools like hoe, dao and digging sticks and family/community labour, depending on monsoon and natural fertility; 'slash and burn'.	2
17	Rearing of silkworms for the production of silk fibre.	2

SECTION — C (Short Answer) — Answers — 6 × 3 = 18

Q.	Expected Answer / Value Points	Marks
18	(i) Identification and inventory of resources across regions — surveying, mapping, qualitative and quantitative estimation (ii) Evolving a planning structure endowed with appropriate technology, skill and institutional set-up (iii) Matching resource development plans with overall national development plans.	1+1+1
19	Corbett National Park (Uttarakhand), Sunderbans National Park (West Bengal), Bandhavgarh National Park (Madhya Pradesh), Sariska Wildlife Sanctuary (Rajasthan), Manas Tiger Reserve (Assam), Periyar Tiger Reserve (Kerala).	3
20	Bamboo pipes divert perennial springs on hilltops to lower reaches by gravity; about 18–20 litres of water enter; channel sections distribute water into branches; flow controlled by manipulating pipe positions; reduced to 20–80 drops per minute at the root of the plant.	3
21	Intensive subsistence — in areas of high population pressure, labour-intensive, high doses of biochemical inputs and irrigation, small holdings due to right of inheritance; commercial — higher doses of modern inputs like HYV seeds, fertilisers, pesticides for higher productivity, produce for market; e.g. rice commercial in Punjab-Haryana but subsistence in Odisha.	3
22	Sariska villagers fought against mining by citing the Wildlife Protection Act; five villages in Alwar declared 1,200 hectares as Bhairodev Dakav 'Sonchuri' with their own rules banning hunting and protecting wildlife against encroachment.	3
	OR: Forests are home to traditional communities whose livelihood depends on them; local people understand the ecosystem; JFM and community initiatives show success; destruction and reconstruction dynamics show that local communities must be involved in decision-making.	3

23	Hills — guls or kuls in Western Himalayas; Rajasthan — rooftop harvesting for drinking water; Bengal flood plains — inundation channels; arid areas — khadins (Jaisalmer) and johads; Bikaner, Phalodi, Barmer — underground tankas.	3
	OR: Dams where many uses of impounded water are integrated: irrigation, electricity generation, water supply for domestic and industrial uses, flood control, recreation, inland navigation and fish breeding.	1+2

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
24	Chipko movement — community afforestation with indigenous species; Beej Bachao Andolan and Navdanya — ecological farming without chemicals; JFM since 1988; Bishnoi community protects blackbuck and nilgai; sacred groves — mahua and kadamba worshipped by Mundas and Santhals, tamarind and mango in Odisha and Bihar; Sariska villagers fought mining; Bhairodev Dakav Sonchuri with own rules.	5
	OR: Earlier projects protected specific animals — tiger, rhino, hangul, crocodiles, Asiatic lion; now more intensive search for conservation measures; insects added — under the Wildlife Act notifications of 1980 and 1986 several hundred butterflies, moths, beetles and one dragonfly added; in 1991 plants (six species) added to the list; Indian elephant, black buck, great Indian bustard and snow leopard given legal protection.	5
25	Rabi: sown October–December, harvested April–June; wheat, barley, peas, gram, mustard; Punjab, Haryana, HP, J&K, Uttarakhand, UP; winter rains from western cyclones. Kharif: sown with onset of monsoon (June–July), harvested September–October; paddy, maize, jowar, bajra, pulses, cotton, jute, groundnut, soyabean; Assam, WB, Odisha, AP, TN, Kerala, Maharashtra, UP, Bihar.	5
	OR: Sustained use of land without techno-institutional changes hindered development; collectivisation, consolidation of holdings, cooperation, abolition of zamindari; land reforms — First Five Year Plan, implementation lukewarm; Green and White Revolutions; comprehensive land development (1980s–90s) — crop insurance, Grameen banks, cooperatives; KCC, PAIS; radio-TV programmes; MSP; Bhoodan-Gramdan.	5

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
