THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 1

Chapter 1: **The Wonderful World of Science** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Asking questions about the things we see around us shows the quality of: 1

(a) jealousy **(b)** laziness **(c)** curiosity **(d)** fear

2. Science is best described as: 1

(a) a systematic way of understanding nature **(b)** a list of names only

(c) a form of entertainment only **(d)** a collection of rumours

3. Which of the following is an example of technology? 1

(a) a cloud **(b)** a mobile phone **(c)** a river **(d)** a mountain

4. The process of carefully looking at things and events using our senses is called: 1

(a) observation **(b)** prediction **(c)** calculation **(d)** conclusion

5. Which of the following is a living thing? 1

(a) a mango tree **(b)** a table **(c)** a cloud **(d)** a stone

6. The use of scientific knowledge to make useful things is called: 1

(a) belief **(b)** luck **(c)** coincidence **(d)** technology

7. An intelligent guess that can be tested by an experiment is called a: 1

(a) hypothesis **(b)** conclusion **(c)** rumour **(d)** theory book

8. A scientist repeats an experiment several times in order to: 1

(a) make the result wrong **(b)** avoid writing

(c) waste time **(d)** make sure the result is reliable

9. Which of the following was a result of scientific discovery? 1

(a) the colour of the sky **(b)** vaccines that prevent diseases

(c) the existence of mountains **(d)** the rising of the sun

10. After performing an experiment we write down what we found. This step is called: 1

(a) guessing **(b)** making a hypothesis

(c) recording and analysing results **(d)** asking a question

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why do scientists repeat experiments? 2

12. Differentiate between science and technology in one line each. 2

13. Give two examples of technology we use at home. 2

14. What is a hypothesis? Give an example. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Write the steps of the scientific method in order. 3

16. What is meant by observation and inference? Give an example of each. 3

17. Differentiate between an experiment and an observation. 3

OR

A student wants to find out whether sunlight is needed for plant growth. Suggest a hypothesis and a fair test. 3

18. Why did Ravi's plants die when he forgot to water them for a week? Name the step of the method he used by watching. 3

OR

Why do we use a microscope? Give one example of what it helps us see. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the scientific method with an example of finding whether seeds need water to sprout. 5

OR

What are the different branches of science? Explain any four briefly. 5

20. Explain the difference between science and technology with two examples each. 5

OR

Explain the importance of recording observations. What should a good record include? 5

END OF QUESTION PAPER — Total: 40 Marks
