THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 2

Chapter 4: **Exploring Magnets** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which of the following is a common shape of a magnet? 1

(a) star **(b)** triangle **(c)** bar **(d)** cloud

2. Which of these tells you that an object is a magnet? 1

(a) it is attracted to a magnet **(b)** it is heavy
(c) it is shiny **(d)** it repels a known magnet

3. The two poles of a magnet are called: 1

(a) left and right **(b)** up and down **(c)** east and west **(d)** north and south

4. If a bar magnet is broken into two pieces, each piece: 1

(a) loses magnetism completely **(b)** has no pole
(c) has two poles **(d)** has one pole only

5. Attraction between a magnet and a piece of iron happens: 1

(a) never **(b)** always **(c)** only at night **(d)** only in the dark

6. A freely suspended bar magnet comes to rest pointing in the: 1

(a) up-down direction **(b)** any random direction
(c) north-south direction **(d)** east-west direction

7. Magnets lose their magnetism if they are: 1

(a) kept dry **(b)** kept with a keeper
(c) heated or hammered **(d)** kept in a box

8. Which of these is the strongest part of a bar magnet? 1

(a) the surface **(b)** the label **(c)** the poles **(d)** the middle

9. The pole of a freely suspended magnet which points towards the north is called the: 1

(a) north pole **(b)** south pole **(c)** neutral pole **(d)** centre

10. A piece of iron can be made into a magnet by: 1

(a) painting **(b)** washing
(c) cutting **(d)** rubbing with a magnet

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Name three shapes of magnets. 2

12. What happens if a bar magnet is cut into two? 2

13. State the rule about attraction and repulsion between magnets. 2

14. How can a piece of iron be magnetised? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Describe an activity to show that like poles repel. 3

16. What would happen if you bring the north pole of a magnet near the south pole of another? 3

17. Give three examples of how magnets are used at home. 3

OR

List three materials that are magnetic and give one use of magnetic material. 3

18. Why is a magnetic needle used in a compass? 3

OR

Explain what a magnetic force is. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe how to make a magnet by the single touch method and test it. 5

OR

Explain the discovery of magnets by ancient people and their use. 5

20. Explain the laws of attraction and repulsion with a suitable activity. 5

OR

Explain with examples how magnets can be used to separate materials. 5

END OF QUESTION PAPER — Total: 40 Marks
