THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 1

Chapter 2: **Invisible Living World: Beyond Our Naked Eye** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Who first observed and named 'cells' in thin slices of cork in 1665? 1

(a) Robert Hooke **(b)** Louis Pasteur
(c) Robert Brown **(d)** Anton van Leeuwenhoek

2. The correct order of increasing complexity is: 1

(a) organ, tissue, cell, organism
(b) cell, tissue, organ, organ system, organism
(c) tissue, cell, organ, organism
(d) cell, organ, tissue, organism

3. Plant cells usually have a large central: 1

(a) membrane only **(b)** vacuole **(c)** nucleus only **(d)** chloroplast only

4. The instrument that makes very small objects appear larger is the: 1

(a) telescope **(b)** periscope **(c)** microscope **(d)** stethoscope

5. A group of similar cells performing a particular function is a: 1

(a) organ **(b)** organelle **(c)** tissue **(d)** organism

6. The function of the cell wall is to: 1

(a) control the cell **(b)** make food
(c) store the genetic material **(d)** give shape and protection to plant cells

7. The structure that controls the activities of a cell is the: 1

(a) vacuole **(b)** cell wall **(c)** nucleus **(d)** cell membrane

8. The heart is an example of: 1

(a) a tissue **(b)** an organ **(c)** an organelle **(d)** a cell

9. Which instrument was used by Anton van Leeuwenhoek to see 'little animals' in pond water? 1

(a) a magnifying mirror **(b)** a telescope
(c) an electron microscope **(d)** a simple microscope with a single lens

10. Which part of a cell regulates the entry and exit of substances? 1

(a) nucleus **(b)** chloroplast **(c)** cell membrane **(d)** cell wall

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Who discovered cells and how? Name the material he observed. 2

12. Why is the nucleus called the control centre of the cell? 2

13. How do bacteria differ from plant or animal cells in terms of the nucleus? 2

14. What is a tissue? Give one example from plants or animals. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Describe how you would prepare a slide of an onion peel and observe it. 3

16. Why is the cell called the structural and functional unit of life? 3

17. Differentiate between the cell wall and the cell membrane. 3

OR

Compare a plant cell and an animal cell by giving three differences. 3

18. Explain the importance of yeast, bacteria and fungi in our daily life (one use each). 3

OR

What is the role of chloroplasts and where are they found? Why are leaves green? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Draw in words and label the parts of a typical plant cell and state the function of each. 5

OR

Differentiate between bacteria, viruses, fungi and protozoa in a tabular form (any four points). 5

20. Describe the levels of organisation in a multicellular organism using the human body as an example. 5

OR

Explain how the shape and structure of a cell is related to its function. Give four examples. 5

END OF QUESTION PAPER — Total: 40 Marks
