CLASS 10 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 2

Chapter 7: **How do Organisms Reproduce?** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Transfer of pollen from anther to stigma is called 1

(a) pollination **(b)** fission **(c)** fertilisation **(d)** germination

2. Fertilisation in human females normally occurs in the 1

(a) ovary **(b)** vagina

(c) oviduct (fallopian tube) **(d)** uterus

3. Planaria cut into pieces can regrow into complete individuals. This is called 1

(a) pollination **(b)** fertilisation **(c)** budding **(d)** regeneration

4. Pollination between flowers of different plants of the same species is 1

(a) budding **(b)** cross-pollination

(c) self-pollination **(d)** fertilisation

5. The zygote gets implanted in the 1

(a) oviduct **(b)** uterus **(c)** ovary **(d)** vagina

6. Spirogyra multiplies mainly by 1

(a) binary fission **(b)** spores **(c)** fragmentation **(d)** budding

7. The pollen tube grows through the 1

(a) anther **(b)** filament **(c)** style **(d)** sepal

8. The special tissue that provides nutrition from the mother to the embryo is the 1

(a) ovule **(b)** prostate **(c)** cervix **(d)** placenta

9. Bryophyllum reproduces vegetatively by 1

(a) stem **(b)** seeds **(c)** roots **(d)** leaves

10. The female reproductive part of a flower is called 1

(a) stamen **(b)** petal **(c)** sepal **(d)** pistil (carpel)

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. What are the two advantages of vegetative propagation? 2

12. What happens to the uterine lining if the egg is not fertilised? 2

13. What is regeneration? Name one organism that shows it. 2

14. Name the male and female reproductive parts of a flower. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Describe the method of spore formation in Rhizopus. 3

16. Differentiate between self-pollination and cross-pollination. 3

17. What is menstruation? Why does it occur? 3

OR

Distinguish between fragmentation and regeneration. 3

18. Describe the structure of a seed and name the parts that become shoot and root. 3

OR

Why do sperms have a tail and a large amount of energy? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain vegetative propagation. Describe two methods with examples and two advantages. 5

OR

What is the menstrual cycle? Explain its phases in brief. 5

20. Describe the structure of a flower with its four whorls. 5

OR

Why does sexual reproduction result in more variation than asexual reproduction? Explain with DNA copying. 5

END OF QUESTION PAPER — Total: 40 Marks
