THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 3

Chapter 7: **How do Organisms Reproduce?** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. If the egg is not fertilised, the uterine lining 1

(a) becomes thicker **(b)** turns into the placenta

(c) grows into a baby **(d)** breaks down and leaves as menstruation

2. Which of the following is an example of vegetative propagation by stem? 1

(a) Dahlia **(b)** Sweet potato **(c)** Rose **(d)** Bryophyllum

3. Fusion of male and female gametes is called 1

(a) germination **(b)** pollination **(c)** fertilisation **(d)** fragmentation

4. Menstrual cycle repeats approximately every 1

(a) 100 days **(b)** 7 days **(c)** 14 days **(d)** 28 days

5. Asexual reproduction gives offspring that are 1

(a) always infertile **(b)** very different from the parent

(c) produced by gametes **(d)** genetically similar to the parent

6. In a seed, the part that develops into the shoot is 1

(a) radicle **(b)** cotyledon **(c)** plumule **(d)** testa

7. Secretion of the prostate gland and seminal vesicles 1

(a) produces eggs

(b) provides fluid and nutrition to the sperms

(c) forms the placenta

(d) produces testosterone

8. Variations are important for a species because they 1

(a) make all individuals identical **(b)** prevent reproduction

(c) stop DNA copying **(d)** help it survive environmental changes

9. Seed germination requires 1

(a) only soil **(b)** water, air and suitable temperature

(c) only fertiliser **(d)** only sunlight

10. Changes at puberty in girls include 1

(a) breast development and start of menstruation
(b) no change
(c) growth of a beard
(d) breaking of voice only

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why are testes located outside the abdominal cavity? 2

12. Why does bread mould spread rapidly on a moist slice of bread? 2

13. Differentiate between pollination and fertilisation. 2

14. What is the role of the pollen tube? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. Can a Hydra regenerate from any piece? Why is regeneration not the same as reproduction? 3

16. Name the parts of the male reproductive system with one function each (any three). 3

17. Compare sexual and asexual reproduction in three points. 3

OR

Why do organisms with complex body designs not use fragmentation or regeneration to reproduce? 3

18. Name the parts of the female reproductive system with one function each (any three). 3

OR

How do the flowers of papaya and watermelon differ from those of hibiscus? 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain the process of sexual reproduction in a flowering plant from pollination to seed formation. 5

OR

Compare asexual and sexual reproduction in a table form (five points). 5

20. Describe the human male reproductive system and the path taken by sperms. 5

OR

Describe the structure of a seed and the process of germination of a bean seed. 5

END OF QUESTION PAPER Total: 40 Marks
